A TTEITI Perspective on Stakeholder Engagement

EITI Board Strategy Meeting, Oslo
February 12, 2020
1. Approach to Stakeholder Engagement

2. An Overview of Activities

3. Final Takeaway & Future Considerations
Our Approach: Who Do We Target?

Civil Society Engagement Strategy targets specific groups as well as wider general public.
Is the TTEITI important/needed?

We are working to counter negative public perceptions of sector

Baseline Assessment (sample > 400) revealed a significant level of mistrust for the Gov’t & extractive companies.

“Too many crooks work for these companies so there is no trust”

“Citizens deserve to have the information but as usual gov’t hides everything”

“More important issue is what the Gov’t does with the tax revenues”

3. Final Takeaway & Future Considerations
Reports crafted for local consumption
Our efforts are yielding results

“I think the outreach to the schools was an excellent idea, simply because students are generally unaware of how to access information like what you presented. They do not look at the news, so any information they receive would have to come out of conversations in their homes. Interacting with them during the Tour through spoken word poetry was a creative way to bring out the information. Also, planning a tour for them of the Estate and presenting to them on job and educational opportunities in oil and gas, will help to expand their ideas of what is available to them. They will not get this information otherwise.”

Mrs. Tardieu – Teacher, Bon Air Secondary School
EITI Beneficial Ownership Declaration Form

This information is required for Trinidad and Tobago to meet the 2016 EITI Standard which calls for reporting companies to disclose the beneficial owners of all corporate entities that apply for or hold a participating interest in an exploration or production oil, gas or mining license or contract. Please use a desktop computer for the best experience.

Let’s get started press ENTER
TTEITI BO and PEP Register

• Free public repository of information on oil, gas and mining companies in Trinidad and Tobago;
• Beneficial Owners and names of Natural Persons;
• Company Data, registered address, BOIR number, type of contract (E&P / PSC) website, etc.;
• Politically Exposed Persons
