Newmont Goldcorp is one of 28 global companies actively involved with EITI’s efforts to improve governance in resource-rich countries. While the Initiative’s efforts focus primarily on building the capacity and will of national governments to transparently account for revenues received from extractive industries, Newmont Goldcorp supports this effort by openly disclosing its tax and royalty payments. Such programs are designed to reduce the devastating effects that corruption can have on economic development and the rule of law in these contexts.
