

REPUBLIC OF ZAMBIA

Zambia Extractive Industries Transparency Initiative

10th Zambia EITI Report

December 2019

TABLE OF CONTENTS

1. EXECUTIVE SUMMARY	9
1.1. Introduction	9
1.2. Key figures of the ZEITI Report 2017	10
1.3. Reporting and reconciliation results	12
1.4. Recommendations	15
2. APPROACH AND METHODOLOGY	17
2.1 Preliminary analyses of the scope	17
2.2 Data collection	17
2.3 Reconciliation and investigation of discrepancies	17
2.4 Reliability and credibility of data reported	18
2.5 Basis and period of reporting	20
2.6 Procedures for the management and protection of the collected data	20
3. CONTEXTUAL INFORMATION ON THE EXTRACTIVE INDUSTRY	22
3.1 Key Features of the Extractive Industry	22
3.2 Legal and institutional Framework	23
3.3 Fiscal Regime	25
3.4 Environmental regulation	30
3.5 Licenses	32
3.6 Contribution of the Extractive Industry to the Economy	40
3.7 Production and Exports	42
3.8 State participation	44
3.9 Collection and Distribution of the Extractive Revenues	48
3.10 Audit and Assurance Practices and Controls in Zambia	52
3.11 Beneficial ownership	53
4. DETERMINATION OF THE RECONCILIATION SCOPE	56
4.1 Revenue Streams	56
4.2 Extractive Companies	58
4.3 Reconciliation Scope	59
4.4 Reporting by Project Level	61
4.5 Level of Disaggregation	63
4.6 Materiality Deviation and acceptable reconciliation difference	63
5. RECONCILIATION RESULTS	65
5.1 Payment Reconciliation between Extractive Companies and Government Agencies	65
5.2 Adjustments	68
5.3 Unreconciled Differences	70
5.4 Unilateral Disclosure of Revenues by Government Agencies	72
6. ANALYSIS OF REPORTED DATA	74
6.1 Analysis of Government Revenues	74
6.2 Analysis of Social Payments	77

6.3	Analysis of Payments by Project.....	77
6.4	Analysis of Employment Data.....	79
6.5	Analysis of Production Data	79
6.6	Analysis of the VAT Credit	80
7.	RECOMMENDATIONS.....	82
7.1	2017 IA Recommendations.....	82
7.2	Follow up of recommendations of previous EITI Processes.....	83
ANNEXES	86
	Annex 1 - Payments from the Oil and Gas companies (Unilateral Disclosure by the Petroleum Unit)	87
	Annex 2 - Company by company reconciliation sheets	88
	Annex 3 - Tracking table of certified reporting templates.....	97
	Annex 4 - Extractive companies' profile and beneficial ownership.....	98
	Annex 5 - Register of Licenses	99
	Annex 6 - List of Licenses Transferred	170
	Annex 7 - Evaluation Criteria for Bids for Petroleum Exploration Licence.....	172
	Annex 8 - Evaluation Criteria for applications for Mining Licence	174
	Annex 9 - Detail of social payments.....	175
	Annex 10 - Detail of the unilateral disclosure by company	184
	Annex 11 - Letter from the Mining Cadastre Department	192

List of Abbreviations

BLL	Blood Lead Level	MTEF	Medium Term Expenditure Framework
BoZ	Bank of Zambia	NAPSA	National Pension Scheme Authority
CEP	Copperbelt Environmental Project	OAG	Office of the Auditor General
CIT	Corporate Income Tax	PAC	Public Accounts Committee
DA	Development Agreement	PACRA	Patents and Companies Registration Agency
EBITDA	Earnings Before Interest, Tax, Depreciation and Amortization	PFM	Public Financial Management
EITI	Extractive Industries Transparency Initiative	SEC	Securities and Exchange Commission
EPF	Environmental Protection Fund	SI	Statutory Instrument
FDI	Foreign Direct Investment	SoE	State Owned Enterprise
GDP	Gross Domestic Product	SME	Small and Medium Enterprises
GRZ	Government of the Republic of Zambia	SWF	Sovereign Wealth Fund
GSD	Geological Survey Department	TPIN	Tax Payer Identification Number
ICMM	International Council of Mining and Metals	US\$	United States dollar
IDC	Industrial Development Corporation	VAT	Value Added Tax
INTOSAI	International Organization of Supreme Audit Institutions	WHT	Withholding Tax
ISA	International Standard on Auditing	ZCCM- IH	Zambia Consolidated Copper Mines - Investment Holdings Plc
ITA	Income Tax Act	ZCM	Zambia Chamber of Mines
KCM	Konkola Copper Mines	ZEC	Zambia EITI Council
LuSE	Lusaka Stock Exchange	ZEITI	Zambia Extractive Industries Transparency Initiative
MLC	Mining License Committee	ZEMA	Zambia Environmental Management Agency
MMMD	Ministry of Mines and Minerals Development	ZICA	Zambia Institute of Chartered Accountants
MoF	Ministry of Finance	ZMERIP	Mining and Environmental Remediation and Improvement Project
MoL	Ministry of Lands	ZMW	Zambian Kwacha
MoLGH	Ministry of Local Government and Housing	ZRA	Zambia Revenue Authority
MSD	Mine Safety Department		
MSG	Multi-Stakeholder Group		
Mt	Metric tons		

List of tables and figures

List of tables

Zambia EITI Council (ZEC)

Republic of Zambia

30 December 2019

In accordance with the contract between the Ministry of Mines and Minerals Development (“MMMD”) and the Consortium of BDO Tunisia Consulting and BDO Zambia (together “BDO”) dated 12 November 2019, BDO was appointed to be the Independent Administrator of the 2017 Zambia EITI Report.

Under this process, BDO was engaged as Independent Administrator (“IA”) to support Zambia EITI Council (“ZEC”) to produce 2017 EITI Streamlined Reconciliation Reports covering the periods January 2017 to December 2017. Our work was carried out between 12 November 2019 and 6 December 2019 based on the engagement contract and terms of reference dated 20 September 2019 and our findings are summarised in the accompanying report, including appendices.

This engagement has been performed in accordance with International Standard on Related Services 4400 applicable to agreed-upon procedure engagements. The procedures performed do not constitute an audit or a review made in accordance with any generally accepted standards on auditing or any generally accepted standards on review engagements and, consequently, no assurance is being expressed.

Had we performed additional procedures or had we performed an audit or a review of the reporting entities financial statements in accordance with any generally accepted standards on auditing or with any generally accepted standards on review engagements, other matters might have come to our attention that would have been reported to you. It is noteworthy to emphasize that reporting entities were requested to provide quality assurances as agreed with the ZEC and duly stated in Section 2.4.

Our report is solely for the purpose set forth in the first two paragraphs and is therefore for your information and is not to be used for any other purposes. In addition, this report relates only to information disclosed in the Reporting Templates submitted by companies and agencies and does not extend to the financial statements of each taken as a whole.

Adnène Zghidi

1 EXECUTIVE SUMMARY

1. EXECUTIVE SUMMARY

1.1. Introduction

1.1.1 Background

The Extractive Industries Transparency Initiative (EITI) is a global coalition of governments, companies and civil society groups working together to improve transparency and accountability in the management of revenues from natural resources. EITI principles are based on the belief that prudent use of natural resources contributes to economic growth, sustainable development and reduction of poverty in resource-rich countries.

Zambia Extractive Industries Transparency Initiative (ZEITI) Overview

Zambia is richly endowed with mineral resources and is one the largest producers and exporters of copper in Africa. In an effort to improve transparency and accountability, Zambia joined EITI as candidate in May 2009 and became fully compliant with the EITI 2011 Standard on 19 September 2012.

As required by the EITI Standard, a Multi-Stakeholder Group (MSG) oversees ZEITI implementation. It consists of 18 members from three sectors: government, industry, and civil society.

To date nine (9) annual EITI Reports have been produced covering the period from 1 January 2008 until 31 December 2016. ZEITI Reports can be accessed at <https://eiti.org/zambia#eiti-reports-and-other-key-documents>.

This report is the tenth EITI report, covering the period from 1 January to 31 December 2017.

Overview of 2017 ZEITI Activities

Building upon the 2016 ZEITI report, the ZEC prioritized several key activities in 2017 to strengthen the information presented, further participation in EITI, and an increase in transparency and public awareness. The ZEC focused on industry reporting and reconciliation and explored how Zambia can comply with changes to the EITI Standard in 2016, notably beneficial ownership and mainstreaming revenue reporting. ZEITI work-plan and progress report for 2017 can be accessed at <https://eiti.org/document/2017-annual-zeiti-progress-report>.

1.1.2 Objective

The purpose of this report is to reconcile the data provided by extractive companies (hereafter referred to as “mining companies” or “companies”) with the data provided by relevant Government Agencies.

The overall objectives of the reconciliation exercise are to assist the Government of the Republic of Zambia (GRZ) in identifying the positive contribution that mineral resources make to the economic and social development of the country and to realise their potential through improved resource governance that encompasses and fully implements the requirements of the EITI Standard 2016¹.

1.1.3 Scope of the report

This report covers payments made by extractive companies and revenues received by Government Agencies and other material payments and benefits to Government Agencies for the calendar year (CY) 2017 (January 1, 2017 through December 31, 2017). The Report also covers mining production, export sales, social payments and transactions between Government Agencies and extractive companies made in 2017.

Reporting companies and government entities reported data for payments made or reported in CY 2017 disaggregated by taxpayer, payments flows and by project where applicable. The amounts in this report are stated in Zambian Kwacha (ZMW) unless otherwise stated.

The report includes information received up to 6 December 2019. Any information received after this date has not, therefore been included in this Report.

1.1.4 Nature and extent of our work

The Independent Administrator’s role is principally to:

- Carry out the procedures agreed with the ZEC;
- Draft and send reporting templates to licensees and government entities;
- Obtain reporting from licensees and government departments to the extent possible;
- Gather the data which is reported by the licensees and government entities;
- Compile the reconciliation and seek to resolve discrepancies to the extent possible;

¹ <https://eiti.org/document/eiti-standard-requirements-2016>

- Prepare a report comprising the reconciled payments and revenues, any differences, and other issues of relevance to understanding the payments and revenues from the activities of the Extractive Industries in Zambia; and
- Prepare a report comprising contextual information using sources that are publicly available together with information requested and reported by government agencies and extractive companies.

Results overview of reconciliation procedures are set out in the succeeding sections while the covered companies and government agencies are discussed in Executive Summary of this Report.

1.2. Key figures of the ZEITI Report 2017

This report summarises information about the reconciliation of fiscal and non-fiscal revenues from the extractive sector in Zambia as part of the implementation of the EITI. In this context, extractive companies and Government Agencies report payments and revenues respectively. In addition; this report includes a reconciliation of revenues collected by the State-Owned Company “ZCCM-IH” from companies and the cash flows contributed by ZCCM-IH to the state budget.

During 2017, the mining sector remained the country’s major productive industry with very high contribution in exports and Government revenues.

1.2.1 Revenue Generated from the Extractive Industry

The receipts reported by the government in 2017, after reconciliation, were as follows:

Evolution and Structure of Revenues

According to the data collected from Government Agencies, revenue generated from the extractive sector totalled ZMW 13.25 billion after the reconciliation work. This revenue includes dividends and other investment income of ZMW 0.70 billion collected by ZCCM-IH from its subsidiaries which operate in the mining sector, as well as social payments of ZMW 0.11 billion paid by companies, while payments to the Environmental Protection Fund (EPF) amounted to ZMW 0.002 billion.

Government Revenues increased from ZMW 10.43 billion in 2016 to ZMW 13.14 billion in 2017. However, over the same period, social payments decreased from ZMW 0.29 billion to ZMW 0.11 billion.

Table below sets out the variances in the sector revenues.

Table 1: Variances in the extractive sector revenues (in ZMW billion)

Aggregated payments	2017	2016	Variance
VAT	3.58	0.68	2.90
Minerals Royalties	2.46	3.08	(0.62)
Import VAT	1.88	2.25	(0.37)
Company Income Tax	1.24	1.33	(0.09)
Other payments to the budget	1.33	1.20	0.13
Contribution to GRZ budget (excluding PAYE)	10.50	8.54	1.96
Pay as You Earn	1.94	1.74	0.20
Total contribution to the State Budget (a)	12.44	10.28	2.16
Payments to EPF (b)	0.002	0.01	(0.01)
Dividends - IDC (c)	-	0.05	(0.05)
Dividends - ZCCM-IH	0.03	0.03	0.00
Other investment incomes	0.66	0.06	0.60
Revenues received by ZCCM-IH (d)	0.70	0.09	0.61
Revenues received by the Geological Survey Department (Petroleum Unit) (e)	0.001	0.00	0.00
Total revenue from the extractive sector (a+b+c+d+e)	13.14	10.43	2.71
Social payments from in-scope companies	0.11	0.29	(0.18)
Total	13.25	10.72	2.53

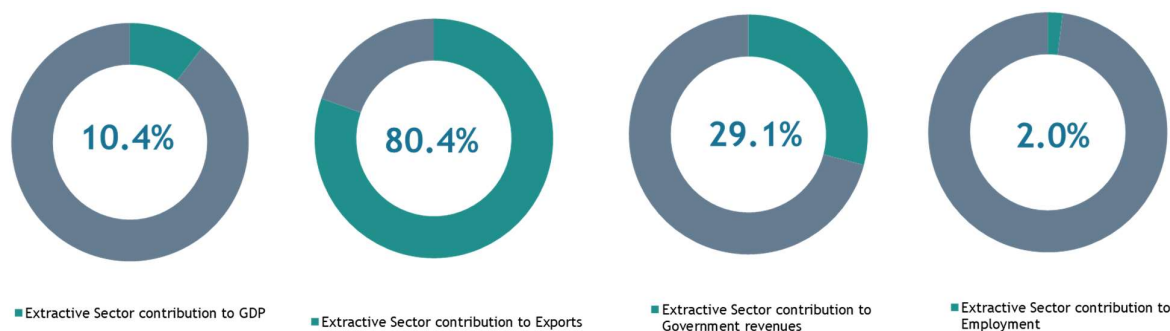

National Contribution

The contribution of the extractive sector in overall increased compared to 2016. This growth is mainly explained by the increase of the copper exports:

Table 2: Contribution of the extractive sector to Zambia economy

	2017	2016
GDP ²	10.40%	10.50%
Exports ³	80.40%	72.80%
Revenues ⁴	29.10%	26.40%
Employment ⁵	2.00%	2.00%

The detailed calculation of the contributions is presented in Section 3.6.

1.2.2 Production and Exports

Production

The production volume and value provided by MMMD for the commodities are set out on the following table:

Table 3: Production of minerals 2017

Commodity	Unit	2017	
		Production Quantity	Value (US \$ million) ⁶
Copper	Metric tonne (MT)	797,266	4,918.08
Gold	Kg	4,565	183.31
Coal	Tonnes	77,500	n/a
Emerald and Beryl	Kg	60,063	n/a
Limestone	Thousand metric tons	23,965	n/a
Quicklime	Thousand metric tons	29,153	n/a
Hydrated Lime	Thousand metric tons	13,650	n/a
Manganese Ore	Metric tonne (MT)	92,675	n/a
Cement	Metric tonne (MT)	2,097,524	n/a
Total of the sector			5,101.39

n/a: not available

MMMD does not assign any value of for the minerals produced in Zambia. The value of the Copper and Gold produced in Zambia has been estimated by the IA on the basis of the World Bank Commodity Price Data. In the absence of such data for the other commodities, it has not been possible to estimate the total value of production of all the commodities in Zambia in 2017.

More details about the minerals production in 2017 are presented in Sections 3.7.1 and 6.5.

² Source: CSO, National Accounts Statistics

³ Source: BoZ annual report 2017, p.14-15

⁴ EITI data

⁵ Central Statistical Organisation - Labour Force Survey 2017: Number and Percentage Distribution of Employed persons by Industry

⁶ Value of production estimated on basis of annual prices provided by the World Bank Commodity Price Data (The Pink Sheet)

Exports

The table below summarizes the evolution of metal exports between 2016 and 2017:

Table 4: Exports of minerals 2017

	Unit	2017	
		Exports Quantity	(US \$ million)
Copper	Metric tonne (MT)	1,023,859.1	6,118.6
Cobalt	Metric tonne (MT)	2,676.4	124.8
Gold	Metric tonne (MT)	n/a	156.1
Gemstones	Metric tonne (MT)	n/a	101.8
Manganese Ores/Concentrates	Metric tonne (MT)	n/a	31.3
Cement & Lime	Metric tonne (MT)	n/a	74.5
Mining exports			6,607.1

Source: BoZ annual report 2017, p.14-15

n/a: not available

We understand that Zambia has not produced refined cobalt since 2012. The cobalt exports relate to ores/concentrates imported from neighbouring country and refined in Zambia.

More details about the minerals exports in 2017 are presented in Sections 3.7.2.

1.3. Reporting and reconciliation results

1.3.1 In-Scope reporting entities and payments flow

The MSG agreed to select the same in scope companies as the 2016 ZEITI Report. Accordingly, the reconciliation scope allows a coverage of more than 79% of the total revenues collected by ZRA from mining companies. Based on the list of companies and revenue streams included in the scope, all Government Agencies involved in revenue collection were required to report under the EITI Standard. The reporting entities and payments flows selected in the scope are listed in Section 4 of this report.

1.3.2 Data collection

All companies and Government Agencies included in the reconciliation scope submitted their reporting templates. Details of submission of the reporting templates by reporting entity are set out in Annex 3 of this report.

1.3.3 Data assurance

Extractive companies were requested to have their reporting templates signed by a senior official. All selected companies have complied with this requirement.

With regards to Government agencies, they were requested to submit reporting templates signed by authorised officers and certified by the Office of the Auditor General. The Office of the Auditor General issued a letter on 27 December 2019 confirming that:

- The accounts for the financial year ended 31 December 2017 for ZRA, Ministry of Finance, Ministry of Mines and Minerals Development, ZCCM-IH, Industrial Development Corporation (IDC), Ministry of Lands and Natural Resources and Ministry of Local Government were audited in accordance with International Auditing Standards;
- Therefore, EITI can use the audited revenue figures for the financial year ended 31 December 2017 to produce 2017 EITI report.

The abovementioned letter does not state that OAG audited the Government agencies EITI reporting templates neither that those are accurate nor comprehensive.

Moreover, local councils were requested to submit reporting templates signed by authorised officers. All Local Councils have complied with this requirement, except Sinazongwe.

Details of submission of the certified reporting templates are set out in Annex 3 to this Report.

Because of the significance of the matter described above, we have not been able to obtain sufficient appropriate evidence to form a conclusion on the overall comprehensiveness and reliability of the data reported by government agencies.

1.3.4 Data reconciliation

The coverage of the reconciliation exercise can be presented as follows:

	Total payments (in ZMW billion)	%
In scope companies	10.39	79%
Other companies (Unilateral disclosure by the Government)	2.71	21%
Total revenues (excluding social payments, ZCCM-IH Dividends and EPF)	13.10	100%

At the date of this report, we reconciled 95.39% of total cash flows reported by the Government.

The remaining unsolved discrepancies amounting to ZMW 0.480 billion represents 4.61% of the revenues reported by the Government. The reconciled amount reported by the government was lower by ZMW 0,480 billion than the reconciled amount reported by companies.

This is above the acceptable final reconciliation difference set by the ZEC at 1%.

Table 5: Reconciliation results 2017

Aggregated payments	Initial reporting (in ZMW billion)	Resolved discrepancies (in ZMW billion)		Adjusted reporting (in ZMW billion)
		Companies	Government	
Companies	9.821	1.052	-	10.872
Government	9.628	-	0.765	10.393
Discrepancy	0.192	1.052	0.765	0.480
%	2.00%			4.61%

The detailed results of the reconciliation exercise per company are presented in the following table with post-reconciliation differences noted between amounts reported as paid by in-scope extractive companies and amounts reported as received by government agencies.

No.	Company	Extractive companies (in ZMW billion)	Government (in ZMW billion)	Differences (in ZMW billion)
1	KANSANSHI MINING PLC	2.675	2.824	(0.150)
2	KONKOLA COPPER MINES PLC	2.763	1.968	0.795
3	LUMWANA MINING COMPANY LIMITED	1.606	1.604	0.002
4	MOPANI COPPER MINES PLC	0.992	0.978	0.014
5	KALUMBILA MINERALS LIMITED	1.275	1.140	0.135
6	FIRST QUANTUM MINING AND OPERATIONS LTD	0.768	1.055	(0.287)
7	CHAMBISHI COPPER SMELTER LIMITED	0.513	0.546	(0.033)
8	ZCCM INVESTMENTS HOLDINGS PLC	0.018	0.017	0.000
9	MAAMBA COLLIERIES LIMITED	0.263	0.261	0.003
	Total payments	10.872	10.393	0.480

The detailed results of the reconciliation exercise per revenue stream are presented in the following table with post-reconciliation differences noted between amounts reported as paid by in-scope extractive companies and amounts reported as received by government agencies.

No.	Revenue stream	Extractive companies (in ZMW million)	Government (in ZMW million)	Differences (in ZMW million)
MMMD		8.098	5.024	3.073
1	Application Fees	-	0.008	(0.008)
2	Licence Fees	0.335	-	0.335
3	Area Charges	5.017	5.017	-
4	Valuation Fees	0.081	-	0.081
5	Annual Operating Permit	0.000	-	0.000
6	Environmental Protection Fund	0.773	-	0.773
7	Other fees & charges	1.891	-	1.891
ZRA		10,127.481	9,671.047	456.434
8	Pay- As-You-Earn	1,383.342	1,400.904	(17.562)
9	Import VAT	1,856.538	1,884.894	(28.356)
10	Mineral Royalty	2,255.379	2,083.627	171.752
11	Company Income Tax (including Provisional Tax)	839.119	856.045	(16.926)
12	VAT	2,824.058	2,486.496	337.562
13	Import/Customs Duty	498.401	518.188	(19.787)
14	Withholding Taxes	393.690	391.674	2.016
15	Excise Duty - Electrical Energy	49.226	49.047	0.178
16	Property Transfer Tax	-	0.172	(0.172)
17	Other taxes (ZRA)	27.729	-	27.729
Local Councils		72.238	53.938	18.301
18	Annual Business Fees	0.063	0.278	(0.215)
19	Property Rates	72.176	53.660	18.516
MoL		2.259	0.497	1.762
20	Ground Rent	2.087	0.497	1.590
21	Consideration Fees	0.026	-	0.026
22	Ground Rent	0.147	-	0.147
ZCCM-IH		662.196	662.196	-
23	Price participation fees	662.196	662.196	-
Total payments		10,872.272	10,392.702	479.570

Full reporting and reconciliation results for 2017 can be found at Section 5 and Annex 2.

More details about the reconciliation results are presented in Section 5.

1.3.5 VAT Credit

In-scope extractive companies have been requested to report data about the VAT Credit for the fiscal year 2017. VAT Credit is defined as the amount of VAT paid by mining companies on purchases of goods and services and which is not yet refunded by ZRA to the companies.

It is worth noting that VAT Credit has been declared only by the in-scope companies and has not been reconciled or confirmed by ZRA.

Furthermore, VAT Credit declared does not represent a cumulative amount up to December 2017 neither considers the refunds and/or offsets that would have been done by ZRA.

The VAT Credit reported by the in-scope companies' amounts to ZMW 4.431 billion in 2017. The breakdown by company is presented in Section 6.6.

1.4. Recommendations

1.4.1 2017 IA Recommendations

For the 2017 ZEITI report, the ZEC built on the foundation of transparent reporting of extractive industry revenue. Per the EITI Standard, the IA made recommendations to the MSG for future improvements in transparency and accountability:

Recommendations	Proposed action	Priority	Structure involved
1 Gender parity in the ZEC members	ZEC should take measure and start discussion with each stakeholder representation to ensure gender balance in its composition and to update the work plan and to document how Gender issues will be taken into account.	Medium	MSG
2 Beneficial ownership data disclosure	PACRA should accelerate the implementation of the BO Register and take necessary steps towards making the register public	High	PACRA
3 Completeness of the data reported on license register	The online portal does not include information on the tax identification number and the BO of the licence holders. This situation does not enable the resulting data to be interoperable and more easily reused. We recommend that MMMD includes systematically this information in the online Mining Cadastre Portal.	Medium	MMMD
4 Management of the Environmental Protection Fund	We recommend improving the implementation of the Environmental Protection Fund (EPF) by setting up a clear investment policy, appointing a fund manager and ensuring that all mining companies comply with the EPF requirements.	High	EPF
5 Disclosure of the production values	We recommend that MMMD collects and discloses accurate and comprehensive information about the values of the minerals produced in the future EITI reports. MMMS should clearly document the methods and assumptions used to determine that minerals values and ensure that these are consistent from one year to another.	High	MMMD
6 Lack of an up to date follow-up of VAT credits	We recommend that ZRA improves the follow-up of VAT refunds and credits by interfacing ZRA's system with other IT modules dedicated for transactions made with taxpayers as "Declaration module" and "payment module". This would also help determine VAT credit for any taxpayer in real time.	High	ZRA
7 Assessment of deviation from the license register	ZEC might consider increasing the assurance level and aligning with best practises of other EITI implementing countries by considering in future reports a sample of license award and transfer to check whether there were any material deviations in practice.	Medium	ZEC

These findings and the associated recommendations are detailed in Section 7 of this Report.

1.4.2 ZEITI Progress in 2017

In the 2016 report, the IA made 5 recommendations to enhance ZEITI, which can be read in full in last year's Executive Summary: <https://eiti.org/document/zambia-2016-eiti-report>.

In addition, Zambia's Validation against the 2016 Standard commenced on 1 January 2017. The Validation Committee found that Zambia has made meaningful progress with considerable improvements in implementing the 2016 EITI Standard. Corrective actions are agreed addressing license allocation (#2.2) and data reliability (#4.9).

The follow up of the latest validation results and the latest EITI report recommendation is presented o Section 7.2.

2 APPROACH AND METHODOLOGY

2. APPROACH AND METHODOLOGY

The reconciliation of revenues from the extractive sector consisted of the following steps:

- analysis of the scope of the reconciliation exercise as agreed by the ZEC;
- collection of payment and other data from Government Agencies and extractive companies which provide the basis for reconciliation;
- comparison of payments and other data reported by Government Agencies and extractive companies to determine if there are discrepancies between the amounts reported as being received by the authorities and the reported as being paid by taxpayers; and
- contacting Government Agencies and extractive companies to investigate and resolve identified discrepancies.

2.1 Preliminary analyses of the scope

The financial flows to be included in the reconciliation, the Government Agencies and companies which were required to report were determined by the ZEC based on the 2016 ZEITI Report.

Under the TOR for the Engagement, we were required to review the relevant background information, including the governance arrangements and tax policies in the extractive industries, the findings from any preliminary scoping work, and the conclusions and recommendations from previous EITI Reports and Validations and support the ZEITI and the Office of the Auditor General to review the scope with a focus on the following:

- Reviewing the comprehensiveness of the payments and revenues to be covered in the EITI Report as proposed by the ZEC and in accordance with EITI Requirement 4;
- Reviewing the comprehensiveness of the companies and government entities that are required to report as defined by the ZEC and in accordance with EITI Requirement 4.1; and
- Supporting the ZEC with examining the audit and assurance procedures in companies and government entities participating in the EITI reporting process.

The scope of the EITI report as decided by the ZEC is described in Section 4 of the report.

2.2 Data collection

A standard reporting template and instructions were designed to facilitate the process for the reporting entities. The template was designed to include the revenue streams paid to each Government Entity and was formatted in such a way that companies could easily identify and determine the appropriate amounts to be disclosed. The reporting templates were sent electronically to the reporting entities.

Companies and Government Agencies were requested to submit a breakdown of payments by date and by receipt in the supporting schedules.

2.3 Reconciliation and investigation of discrepancies

The data reconciling exercise was carried out between 4 November and 6 December 2019. In carrying out the reconciliation, we performed the following procedures:

Initial Reconciliation Procedures: Figures reported by extractive companies were compiled item by item and compared with figures reported by Government Agencies. As a result, all discrepancies identified have been listed by item in relation to each Government Agency and company.

In cases where the reported revenue data from Governmental Agencies agreed with a company's reported payment data, with deviation within the allowable variance as described in section below, the government figures were considered to be confirmed and no further action was undertaken.

In cases where the reported revenue data from Governmental Agencies did not agree with a company's reported payment data and the difference was not within the allowable variance, discrepancies were identified for each company and Government Entity and the discrepancies were subject to further investigations before completing the initial reconciliation report.

Reconciliation Variance and Level of Effort: As part of the reporting template finalisation, a variance threshold of ZMW 10,000 was set to help determine an acceptable level of effort to be spent in attempting to resolve discrepancies.

In cases where the reported revenue data from government Agencies did not agree with the company's reported payment data, and the discrepancies were at or below the variance threshold, the Reconciler concluded that the discrepancies were not material to the ZEITI Report.

Follow-Up Procedures to Investigate Differences: In cases where the reported revenue data from Governmental Agencies did not agree with the company's reported payments and the discrepancies were outside the variance, the IA considered the discrepancies to be material and further investigations were performed in a bid to resolve these discrepancies. In such instances, the Government Agencies and companies were requested to provide supporting documents and/or confirmations in respect of any adjustments to the data provided in the original reporting templates.

We contacted the reporting entities and arranged meetings with relevant officials. We also reviewed additional supporting documentation evidencing the payments reported. In instances where we were unable to identify the reason for the discrepancies following the review of additional supporting evidence, we concluded that the discrepancies were "undetermined / unexplained". The results of our work are presented in Section 5 of the report. Adjustments made to reporting templates are presented Section 5.2.

2.4 Reliability and credibility of data reported

Initial assessment of assurance procedure

The EITI Standard requires that a credible assurance process applying international standards should be in place. The approach adopted for the 2017 ZEITI Report incorporated constraints existing in Zambia and insufficiencies noticed during the previous reconciliation.

BDO applied its professional judgement to assess the extent to which reliance can be placed on the Existing Controls and Audit Framework (ECAF) of the companies, SOEs and government entities. This step helps in determining the Initial Assessment of Assurance (IAA) for each of the reporting. In short, when the AF is rated low, the IAA is rated low (i.e. low assurance).

The assessment is based on the key factors such as accounting standards applied (international standards, local reliable standards, other standards), existing governance and internal controls, audit standards applied where the entities are audited, and the reliability of the auditor where an auditor exists.

In order to comply with EITI Requirement 4.9 of the EITI Standard (2016) which aims to guarantee the credibility of the data submitted by reporting entities, the ZEC agreed the following approach for the preparation of the 2017 ZEITI report.

Extractive companies

The classification was made based on the accounting standards applied (see Section 3.10), audit standards applied where the companies are audited. The ECAF and the IAA for the extractive companies were considered medium for extractive companies and high for listed companies.

The companies selected in the scope where requested to submit their reporting templates:

- signed by a senior company official from attesting that the completed reporting form is a complete and accurate record; and
- supported by details of payments reported.

Government Agencies

Usually, in most developing countries central government agencies and SOEs are in a low range of the rating for the ECAF and thus for the IAA. BDO considered the reconciliation findings as well as the identified weaknesses raised in past ZEITI Reports and concluded that this would be consistent with medium ECAF.

Based on the above, BDO and the ZEC agreed that for the 2017 that all Government Agencies selected in the scope should submit a reporting template signed by a person authorized to represent the Government Agency and accompanied by payment details reported.

All Government Agencies were also requested to submit a reporting template certified by the Office of the Auditor General, except for local councils.

Final assessment of assurance procedure

BDO analysed the data received from government agencies and from companies as described in the section above and applied the following criteria for assurance:

- Non-submission of a reporting template signed by a person authorized to represent the Government Agency, the SOE or the company reduced the level of assurance;
- Non-submission of payment details for the amounts reported also reduced the level of assurance; and
- Absence of audit reports or reporting reduced the level of assurance.

Thus, the level of assurance for each selected entity was graded:

- Low level of assurance - entities that are not audited and did not provide signed hard copy of the reporting template.
- Medium level of assurance - entities that are not audited and did provide signed hard copy of the audit report or companies that provided audit report but no signed hard of the Reporting Template
- High level of assurance - entities that provided hard copy of the reporting template signed by the respective representatives as stated above and provided audit reports/certified reporting template.

The assessment of assurance is presented in the table below:

Companies	Number of companies	Total payments (in ZMW billion)	% based on revenue stream	Assessment
No signed hard copy of RT	0	0	0%	Low
Provided signed hard copy of	9	10.39	100%	High
Total	9	10.39	100%	

Gov Agencies and SOEs	Number of entities	Total payments (in ZMW billion)	% based on revenue stream	Assessment
No audit report and hard copy of RT	-	10.39	100%	Low
Provided hard copy of RT, but no audit report	-	-	-	Medium
Provided hard copy of RT and audit report/certified RT				High
Total		10.39	100%	

The Office of the Auditor General issued a letter on 27 December 2019 confirming that:

- The accounts for the financial year ended 31 December 2017 for ZRA, Ministry of Finance, Ministry of Mines and Minerals Development, ZCCM-IH, Industrial Development Corporation (IDC), Ministry of Lands and Natural Resources and Ministry of Local Government were audited in accordance with International Auditing Standards;
- Therefore, EITI can use the audited revenue figures for the financial year ended 31 December 2017 to produce 2017 EITI report.

Conclusion - Assessment of the overall comprehensiveness and reliability of reconciled data

Based on the ZEC agreed assurance procedures, we conducted the Final Assessment of Assurance after the reconciliation of the financial data. For companies, 100% of the total revenues reconciled was assessed within high range.

For Government Agencies, the total revenues are assessed within low assurance range.

Therefore, the IA concluded that the final assessment of the overall comprehensiveness and reliability of reconciled financial data government entities to be unsatisfactory.

2.5 Basis and period of reporting

In order to comply with Requirement 2 of the EITI Standard, the ZEC agreed that the 2017 ZEITI Report would be based on data for the fiscal year 2017, which is 1 January 2017 through 31 December 2017.

The revenue streams included in the reconciliation scope relate to only the payments made by companies and revenues received by Government Agencies during FY 2017. The period in which the taxes are incurred by companies is not relevant; only the period in which the taxes were paid and reported is relevant.

The reporting currency is ZMW. For payments made in foreign currency, the reporting entities were required to report in the currency of payment. Payments made in foreign currency (US\$) have been converted to ZMW at the actual rate used by the Government Agency to record the amount received.

Where actual rates were not available or not disclosed by the reporting entities, we applied the average rate for the period as published by the Bank of Zambia (BoZ). The average rate used was US\$ 1 = ZMW 9.5349

2.6 Procedures for the management and protection of the collected data

In order to protect the confidentiality of the data collected from the reporting entities, the following measures have been applied:

- only the data required by the EITI Standard, Terms of Reference and reconciliation exercise has been requested. Any irrelevant information inadvertently communicated has been deleted and/or destroyed;
- data collected is processed on password-protected laptops and e-mail communications are performed via secure messaging servers;
- reporting entities were requested to address the completed reporting template and any information considered sensitive or confidential directly to the IA's generic email address: (zeitibdo@bdo.tn)
- all requests for additional information from Government Agencies or extractive companies for the reconciliation purposes were processed in accordance with the above protocol.

3 CONTEXTUAL INFORMATION ON THE EXTRACTIVE INDUSTRY

3. CONTEXTUAL INFORMATION ON THE EXTRACTIVE INDUSTRY

3.1 Key Features of the Extractive Industry

3.1.1 Oil and Gas

Zambia is richly endowed with mineral resources and is one of the largest producers and exporters of copper in Africa. However, it has also been increasingly engaged in a quest for its petroleum reserves. Zambia started embracing this vision in the early 1970's as a result of the rise in price of crude oil on the international markets and the dwindling revenues from the country's copper exports.

Historically, the country has had two major exploration programs by Mobil and Placid Oil undertaken between 1986 and 1991 within the Luangwa Rift Valley, one was terminated before intersecting the most favourable reservoir horizons. Considerable thicknesses of littoral and continental sediments underlain by carbonaceous rocks with oil generating potential are present within the Karoo-age graben of both the Luangwa and Mid-Zambezi Valleys.

Oil and gas exploration resumed in 2004 following the discovery of oil and gas in Uganda and Kenya in the Great East African Rift Valley, which rift is believed to extend to Zambia. The discovery of oil and gas in East Africa rekindled interest by oil exploration companies to explore in the basins of Zambia. The interest shown by exploration companies coupled with reports of oil seepages in North-Western Province prompted Government to resume oil and gas exploration. The Geological Survey Department embarked on preliminary oil exploration from 2005 to 2008. These activities started in North Western Province and involved collection of soil samples and testing using a technique called "Microbial Prospecting for Oil and Gas (MPOG)". This technique is based on the understanding that oil and gas fields emit hydrocarbon gases at the surface of the earth which micro-organisms known as Hydrocarbon Oxidizing Bacteria (HOB) depend on as their source of energy. Therefore, the presence of this bacteria is an indication of the presence of the hydrocarbons in the ground. The laboratory results from the collected samples tested positive for the bacteria.

The positive results encouraged Government to extend prospecting activities to other Provinces and to revise the legal framework. Prospecting activities were extended to Western, Eastern, Southern, Northern, and Luapula Provinces. The Petroleum (Exploration and Production) Act of 1985 was repealed and replaced with the Petroleum (Exploration and Production) Act of 2008.

Prospective areas were demarcated into blocks in preparation for the participation of the private sector. In accordance with the law, the blocks are licensed through competitive bidding. Three licensing rounds have so far been held, in 2011, 2013 and 2016 and accordingly seventeen licenses were issued in 2011, nine in 2013, and two in 2016. Currently, twelve (12) of the blocks are under licence, six (6) of which are active. Fourteen (14) licences were cancelled (not renewed) in 2015 for non-performance. The detail of the active licenses is shown in Section 3.5.1.

3.1.2 Mining

The country had declining copper output throughout the 1990s, but a mixture of privatisation and high copper prices has seen a substantial boost to investment and output. Zambia's mining sector has been highly amenable to foreign investment since the privatisation of state-controlled Zambia Consolidated Copper Mines (ZCCM) at the end of the 1990s.

Copper mining and refining are the dominant components of Zambia's mineral industry. In 2017, the country accounted for around 4%⁷ of world mined copper production. The country also produced bismuth, crude steel from scrap, precious and semiprecious gemstones and gold.

Concentration of mining activity in Zambia has recently diversified out of the Copperbelt Province into virtually all the other nine provinces but mainly the North-Western Province (largely viewed as 'the new Copperbelt'), Southern Province, Luapula Province, Central Province and Eastern Province. For a more detailed view of the spread of mining activity around Zambia, refer to the Zambia Mining Cadastre Portal at <http://portals.flexicadastre.com/zambia/>.

Following the completion of the privatisation of the mining sector in Zambia in 2000, mining in the country is predominantly private sector driven. The state transformed the parastatal agency that owned virtually all the productive mines and tenements before 2000 into an investment company known as Zambia Consolidated Copper Mines Investment Holdings (ZCCM-IH), which retains minority interests in most large-scale mining projects.

However, all the large-scale mines in Zambia, as well as most prospective tenements, are in private hands with constitutionally protected title to minerals discovered or won. The state deliberately promotes a policy of a private sector-driven mining industry.

⁷ USGS (<https://www.usgs.gov/centers/nmic/copper-statistics-and-information>)

Artisanal and Small-scale Mining & Quarrying

The artisanal and small-scale mining are facing many challenges. A recent census of development minerals in Zambia, conducted by the ministry of mines and ACP_EU development minerals programme, revealed that of the 109 mining plots visited in 10 provinces of the country, approximately 75% held legal licenses. A vast majority of the ASM were unaware that their activities required a licence. According to the Planning department within the MMMD the main challenges of the ASM sector in Zambia are:

- Limited access to financial resources. The majority of ASM workers cannot afford to buy the required equipment;
- ASM is conducted in the unsafe and uncoordinated way;
- Only a few ASM pay taxes since most are illiterate and do not maintain proper records;
- There is no compliance on reporting production returns and annual licence fee renewal; and
- The sector lacks appropriate management and technical skills.

In this context, Zambia hosted the International Conference on Artisanal and Small-scale Mining and Quarrying (ASM18) during September 2018.

Artisanal and small-scale mining (ASM) is an important livelihood activity for millions of people in the developing world representing as many as 90% of the global mining workforce, however, environmental, social, business and labour challenges have hindered the potential of ASM to contribute to sustainable development.

A wide spectrum of commodities were discussed at ASM18 ranging from the well-known, such as gold, diamonds, tin, tungsten, tantalum, and coloured stones, to those that have yet to receive significant attention, such as Development Minerals, like gravel, and clay that are mined and used locally.⁸

ASM18 aimed to foster a global dialogue about the development opportunities and challenges of ASM. It was space for the voices of ASM to share visions of the future. The conference programme consisted of a mix of plenary sessions, consisting of Davos-style panels; parallel sessions consisting of workshops, dialogues and demonstrations; as well as cultural events. The final chart of the conference used the traditional name of Victoria Falls, located adjacent to the conference venue “Mosi-oa-Tunya Declaration”. The declaration emphasised the importance of Development Minerals mined and used domestically, such as industrial minerals and construction materials.⁹ More information is available on ASM18’s website at: <http://www.asmconference.org/>.

3.2 Legal and institutional Framework

3.2.1 Oil and Gas

The legal framework governing the upstream petroleum industry is the Petroleum (Exploration and Production) Act, 2008 and Petroleum (Exploration and Production) (General) Regulations 2011 and Petroleum (Exploration and Production) (National Petroleum Company) Regulations, 2011.

In order to make investment in petroleum upstream sector attractive, the Petroleum (Exploration and Production) Act, 2008 and its subsidiary legislation is currently undergoing review. Stakeholder inputs have been incorporated in the Act under review and the draft has been submitted to the Ministry of Justice for legislative drafting. The enactment of the Act is expected to commence after legislative drafting by the Ministry of Justice.

The key regulators include the Minister for Mines, the Petroleum Committee, the Petroleum Technical Committee and the Hydrocarbon Unit. The main regulator is the Ministry of Mines and Minerals Development, who is also the issuing authority of all petroleum rights under the Act. Despite wielding considerable power, MMMD cannot act without coordinated input from other regulators. For instance, the Minister may not approve the grant or renewal of petroleum rights without first referring the matter to the Technical Committee for scrutiny. Similarly, the Technical Committee is tasked with making recommendations to the Petroleum Committee. Without the approval of the Petroleum Committee, the Minister may not act.

⁸ http://www.undp.org/content/undp/en/home/news-centre/news/2018/Global_gathering_of_artisanal_and_small-scale_miners_charts_new_vision_for_sustainable_development.html

⁹ http://www.asmconference.org/pdf/Mosi-oa-Tunya_Declaration_EN.pdf

The key responsibilities of each agency in managing the petroleum sector can be summarized as follow:

Entity/Department	Prerogatives
MMMD	The Ministry divides the territory into blocks with the approval of the Petroleum Committee and issue invitations for bids for the grant of the petroleum exploration licences
The Hydrocarbon Unit	The unit is an establishment within the Geological Survey Department of the MMMD who principally ensures carrying out preliminary seismic and geo-physical surveys for hydrocarbons, compiling available seismic, aeromagnetic and geo-physical data into packages that would encourage detailed exploration activities, monitor geological, geophysical and geochemical exploration activities including adherence to approved environmental management plans during petroleum exploration and receiving and processing bids and application for licences.
The Petroleum Technical committee	The Committee ensures evaluation of the bids and applications and makes recommendation to the PC.
The Petroleum Committee	The Committee grants the licences based on the recommendation made by the PTC.

3.2.2 Mining

Mining sector reform began with enactment of the Mines and Minerals Act No.31 of 1995 which provided for private sector ownership of mining rights. The general regulations related to the administration of mining and non-mining rights were not introduced until September 2008 following enactment of the Mines and Minerals Development Act No.7 of 2008 which repealed the 1995 Act. The finalization of the regulations was driven by high investor demand and the subsequent government decision to improve the management of mineral rights. Up until then, the different cadastral offices (Lusaka, Kitwe, Livingstone, Chipata, and Mkushi) applied a blend of old procedures and non-codified interpretations based on the 1995 mining law. The new regulations included specific procedures for licensing (registering of applications, geometry, and geographical marking of licenses, and so on). The 2008 Mines and Minerals Development Act abolished the Mine Development Agreements, provided for non-exclusive licenses and review of all applications by the Mining Advisory Committee (MAC).

In 2017, the primary law governing the mining sector is the Mines and Minerals Development Act [No.11 of 2015] of the Laws of Zambia (MMDA) 10 as read together with the Mines and Minerals Development (Amendment) Act [No. 14 of 2016]. The MMDA became effective on 1st July 2015 although the date of assent is 14th August 2015. It repealed and replaced the Mines and Minerals Development Act No.7 of 2008. Administration is regulated under the Mines and Minerals Development (General) Regulations, SI 7 of 2016.

The government policy does not participate in exploration or other mining activities, or in any shareholding activity other than in a regulatory and promotional role. The right to explore or produce minerals is authorized by a license granted under the Mines and Minerals Act Development Act No.11 of 2015.

The MMDA deals with mining rights, licenses, large scale mining in Zambia, gemstones mining, health and safety, environmental protection, and geologic services on analyses, royalties and charges. The sector is administered by the Geological Survey Department, the Mines Development Department, the Mining Cadastre Department and the Mines Safety Department of the MMMD.

The key responsibilities of each agency in managing the mining sector can be summarized as follow:

Entity/Department	Prerogatives
MMMD	The MMMD is responsible for the development and management of mineral resources in a sustainable manner for the benefit of the people of Zambia. The MMMD is responsible for enacting legislations for the mining sector in Zambia and its mission includes among others, supervision mining activities, negotiation with mining companies with respect to environmental and social provisions contained in subsidiary agreements to the development agreements and prescribing royalty rates
Mining Licensing Committee	The Committee: <ul style="list-style-type: none"> Consider applications for mining rights and non-mining rights and grant, renew or refuse to grant or renew mining rights and non-mining rights; terminate, suspend or cancel mining rights and non-mining rights; amend the terms and conditions of mining rights and non-mining rights; and advise the Minister on matters relating to its functions under this Act.

¹⁰<http://www.parliament.gov.zm/sites/default/files/documents/acts/The%20Mines%20and%20Minerals%20Act%2C%202015.pdf>

Entity/Department	Prerogatives
Department of Geological Survey	The department is mandated to compile and provide geoscience data and information aimed at encouraging primarily the mineral sector and non-mining sector investment and undertake regional geoscience and geological resource mapping, and compile resulting quality products ready for publication in form of maps. The department also archives statutory reports submitted by mineral tenement holders and be the State repository of all geoscience data and further provide sound professional technical advice and services to the State and all other stakeholders
Mining Cadastre Department	The department is charged with the responsibility of cadastral surveys or cadastral maps, and holds a comprehensive register of the mining rights or real property's metes-and-bounds of a country
Mines Development Department	The department is responsible of issuance and administration of mining rights, gemstones sales certificates, import and export permits and monitoring of the mining operations to ensure that mine development is in line with approved programs of operations and in accordance with the Mines and Minerals Development Act. The Department is also responsible for collection, compilation and dissemination of mineral production statistics, undertaking reconnaissance surveys and demarcation of mining rights/plots
Mines Safety Department	The MSD is responsible for all matters pertaining to safety and health of persons employed in Exploration, Mining and Mineral processing operations throughout the Republic of Zambia in line with the provisions of the Mines Minerals Development Act number 7 of 2008.

3.2.3 Updates to Relevant Laws and Regulations

In November 2017, the Government of Zambia repealed and replace the Companies Act Cap 388 with the Companies Act No. 10 of 2017. The new Act includes, amongst other things, beneficial ownership (BO) disclosure. The New Companies Act provides for the disclosure of beneficial owners and the creation of a register of beneficial owners that will be kept at the Patents and Companies Registration Agency (PACRA). More details on BO definition and requirements are included in Section 3.11.

3.3 Fiscal Regime

3.3.1 Oil and Gas

The Zambian government generates revenues from exploration companies operating in the gas and oil industry through taxation.

Taxation in Zambia is governed by the Income Tax Act, Customs and Excise Duty Act, the Property Transfer Tax Act and the Value Added Tax Act and other related legislations. Under the Income Tax Act, corporate tax applicable on taxable income of companies holding petroleum development and production licences is 35%.

In addition, 10% withholding tax is charged on rentals, and 15% on bank interest, dividends, management and consultancy fees.

Fees and rentals for the oil and gas sector are also collected and include:

- fees for inspection of the register;
- application fees for the petroleum exploration licence and its renewal;
- application fee for a development and production licence;
- annual licence fee (production);
- annual licence fee (exploration); and
- surface rentals.

The Zambian Petroleum sector is structured as a licence system rather than as a contract regime and production sharing system. The rights and obligations of licensees are governed principally by the terms and conditions of the licence, and the legislation listed above. All companies are using conditions attached to exploration licenses since the Petroleum legislation 2010 is drafted.

3.3.2 Mining

Fiscal regime

Zambia's mineral fiscal regime in 2017 is summarised below:

Royalty rate	
Base Metals	5% NORM
Copper	4 - 6% NORM
Precious Metals	6% NORM
Gemstones	6% GROSS
Energy Minerals	5% GROSS
Industrial Minerals	5% GROSS
Tax deductible	Yes
Corporate Income Tax	30%
Tax on income from mineral processing	35%
Withholding tax	
Services rendered by affiliated entities	20%
Services rendered by other entities	20%
Interest on loan for mining operations	15%
Hedging activity as part of mining	No
Tax on hedges (treated as separate source)	35%
Capital expenditure allowance	25%
Loss carry forward - years	10
Loss deduction cap -percentage of income	50%
Transfer pricing rules on interest payments	Yes
Value Added Tax	Exports are zero-rated
VAT rebate on fuel	90%
VAT rebate on electricity	100%
VAT on imported capital equipment & machinery	Yes, 100% claimable
Input VAT claims on consumables	Yes, except motor spares
Export duty (Concs & other semi processed material)	10%
Import duty (concentrates)-removed early 2017	7.5%
Custom duties on capital equipment & machinery	Exempt

Royalty Rate parameters

4% when LME average Cu for month is below US\$4,500/MT Cu

5% when Cu = US\$4,500 - <6,000/MT

6% when Cu is = or >US\$6,000/MT

ZRA to calculate average copper price to be used in determining MRT rate

Fiscal regime history

The tax regimes applied since the privatisation of Zambia's mining sector are detailed as follow:

Fiscal regimes	Key contributions
The Development Agreements (DAs) negotiated with individual mines during privatisation (1997 to March 2008).	<p>Soon after the privatisation process was complete in the early 2000s, global demand for base metals, including copper, rose sharply. Even after the impact of the economic slowdown induced by the global financial and economic crisis in 2008, the price of copper increased between 2003 and 2011 to above US\$ 8,000 per tonne. Investments also increased: gross capital formation averaged 23% of GDP between 2003 and 2009.¹¹ In the same period, Foreign Direct Investment (FDI) in the mining sector increased to more than 60% (US\$4.5 billion) of total FDI (GRZ, 2010). Despite the price and output booms, weak revenue generation for the Government continued even in the post-privatisation period. This was a direct consequence of the contractual agreements and generous incentives granted to private foreign mining companies.¹² During the privatisation process, the sale of ZCCM assets was negotiated bilaterally between the Government and the mining companies and became part of the DAs. Each DA contained a fiscal stability clause. Without these incentives it would not have been possible to invest billions of dollars into rebuilding the assets sold by ZCCM between 1997 and 2000.</p> <p>The Foreign Investment Advisory Service (2004) of the World Bank argued that, due to the incentives granted to the mining sector, the marginal effective tax rate¹³ was in the region of 0%. The subsidy granted to the purchase of mining machinery, at 18.3% represented the largest in any sector for any asset. Adam and Simpasa (2011) estimate that the positive shock from price increases generated a permanent income stream in excess of 5% of pre-boom GDP, translating into a potential saving of US\$1.4 billion (39% of 2002 GDP) in net present-value terms. However, the private mining companies, through profit repatriation, appropriated the bulk of this windfall and made dividend pay-outs to foreign shareholders.¹⁴</p>
The "2008 regime" (April 2008 to March 2009)	The 2008 reforms stipulated that no special agreements should be entered into by the Government for the development of large-scale mining licences and rendered the development agreements void. A new tax regime with higher tax rates was introduced by this reform.
The "2009 regime" (April 2009 to March 2012)	In response to the concerns of mining companies about the revocation of the DAs, some of the 2008 tax measures were reversed in the 2009 Budget. Details are shown in the table below.
The "2012 regime" (from April 2012)	Further reforms were made to the mining tax regime in the 2012 budget. The two main changes for the mining industry were: (i) the increase of the mineral royalty rates for copper and cobalt and (ii) hedging and operating income were again to be treated separately for income tax purposes.
The "2015 regime" (from January 2015)	<p>The 2015 budget introduced major changes to the mining fiscal regime. It moved away from a system comprising a flat royalty rate (6%), corporate income tax and a variable income tax, to a royalty-only system with differentiated rates for underground mining (8%) and open cast mines (20%). While Corporate Income Tax (CIT) was abolished on mining operations, it was retained for income earned from tolling (processing raw materials owned by another party) and from processing of purchased ores, concentrates and other semi-processed minerals.¹⁵</p> <p>The authorities estimated that the change would boost budget revenues from the mining sector by about 1% of GDP, based on an assumption that the change would have no adverse impact on production.</p> <p>However, and reflecting the negative impact on the sector's profitability, some mining companies announced plans to reduce operations and defer new investments.</p>

¹¹ <http://www.zccm-ih.com.zm/>

¹² For instance, in the project document outlining the proposed development of Lumwana Copper Project operated by Equinox (Equinox Minerals Ltd, 2011), it is indicated that the provisions of the Development Agreements would apply to the project, despite the revocation of the instruments in 2008

¹³ The marginal effective tax rate is designed to measure incentives for investment, is a calculation that takes into account effects of measurement and timing of income in determining the impact of a tax applied to an additional dollar of capital income. The marginal effective tax rate on capital income is the expected pre-tax rate of return minus the expected after-tax rate of return on a new marginal investment, divided by the pre-tax rate of return.

¹⁴ The price boom started in 2003 and peaked in the first half of 2008 before the global financial and economic crisis pushed the price of copper towards the 2003 levels but remained above the long-run average. Thus, 2002 is used as a counterfactual while the end of 2008 represents termination of the boom when the prices were at all-time low in December 2008.

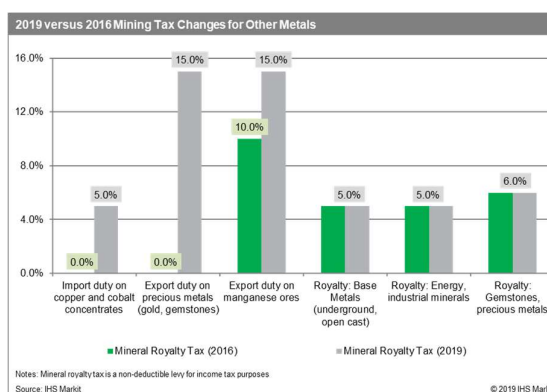

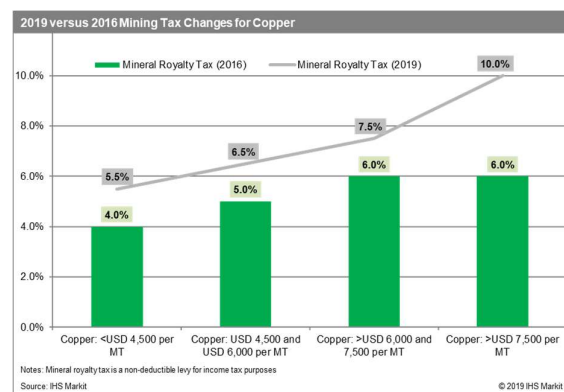

¹⁵ As per the original 2015 budget: an 8 percent royalty for underground and 20 percent for open-cast mining operations as final tax; 30 percent CIT on income earned from tolling, and 30 percent CIT on income earned from the processing of purchased mineral ores, concentrates and any other semi-processed minerals, previously taxed as income from mining operations. Income from industrial mineral is taxed at the variable tax rate (30 percent to 45 percent). A mineral royalty of 20 percent is charged on a person possessing minerals where the supplier to that person has not paid mineral royalty tax.

Fiscal regimes	Key contributions
	<p>The Zambia Chamber of Mines (ZCM) estimated that annual production lost could reach 150,000 tons and about 12,000 jobs could be lost in 2015. Information from the first quarter of 2015 showed mineral royalties at 41% below the government's target.¹⁶ This underperformance was associated with both the new fiscal regime and lower copper prices.</p>
<p>The "2015 regime" (from July 2015)</p>	<p>After several discussions with mining companies and a six-month standoff with miners over the proposed changes, the final royalties were set at 9% for open-cast mining, with underground operations remaining at 6%. CIT on profits earned from tolling was again introduced at 30%.</p>
<p>The 2016 regime (from April 2016)</p>	<p>On 13 April 2016, the Zambian Government tabled the Mines and Minerals Development (Amendment) Bill, 2016 to amend the Mines and Minerals Development Act, 2015 and reduce the mineral royalty payable by mining operators (with retroactive effect to 1 April 2016).</p> <p>The Bill made significant changes to the mineral royalty regime related to copper, setting levies in the range of 4% to 6% depending on copper prices. The previous rates were 6% for underground mining and 9% for open-cast mining.</p> <p>In addition, with effect from 1 June 2016, the 2016 Income Tax (amendment) Bill removed the variable profit tax on income from mining operations.</p> <p>Companies conducting mining operations became subject to corporation tax at the 30% rate. Prior to this amendment income from mining operations was taxed at a flat rate of 30% where the income from mining operations did not exceed 8% of the gross turnover. Where it exceeded 8% it was taxed using the variable profit tax formula. Income earned solely from mineral processing is subject to CIT at a rate of 35%.</p>
<p>The 2019 regime (from January 2019)</p>	<p>On 28 September 2018, the Ministry of Finance announced that several changes to the Zambian mining tax regime have been made and included in the country's 2019 budget delivered on 28 September 2018 to the National Assembly. In case they are adopted by parliament, these changes are expected to take effect from 1 January 2019. The proposed changes to the mining tax regime are as follows:</p> <ul style="list-style-type: none"> a) Increase mineral royalty rates by 1.5 percentage points at all levels of the sliding scale; b) Introduce a fourth-tier rate at 8.5 percent on the sliding scale mineral royalty regime which would apply when copper prices are between US\$7,500 and below US\$9,000 per metric tonne; c) Introduce a fifth tier rate at 10 percent which applies when copper prices are US\$9,000 per metric tonne or higher d) Make mineral royalty tax non-deductible for income tax purposes; e) Introduce an import duty at the rate of 5 percent on copper and cobalt concentrates; f) Introduce an export duty on precious metals including gold, precious stones and gemstones at the rate of 15 percent; g) Lift the suspension of the export duty on manganese ores and concentrates which was put in place in 2012 and increase this duty to 15 percent from 10 percent; and h) Reduce the company income tax rate to 15 percent from 35 percent for companies that add value to copper cathodes i) Increase the mineral royalty rate for cobalt from 5% to 8% of the "norm value" of cobalt. <p>Other proposed changes are not specific to the mining sector but will have an impact on it. These changes relate to:</p> <ul style="list-style-type: none"> a) Abolish the Value Added Tax and replace it with a simpler and non-refundable Sales Tax; b) Restrict the interest allowable for deduction to 30 percent of the earnings before interest, tax, depreciation and amortization (EBITDA); c) Remove the limitation requirement to retain records for up-to six years in respect of documents for transfer pricing purposes and allow for assessments to be made beyond the period of six years but not beyond 10 years, and increase the penalty for non-compliance with transfer pricing regulations to eighty million penalty units from ten thousand penalty units; and d) Increase the withholding tax rate on dividends, interest and branch profit remittance to 20 percent from 15 percent.

¹⁶ <http://mines.org.zm/zambian-mining-sector-expresses-serious-concerns-with-the-2015-zambia-national-budget/>

The table and graphics below show the changes made by The Mines and Minerals Development Act (Amendment) on Mining Royalties between 2016 and 2019:

	Base	2019	2016
Cobalt			
All prices	norm value	8%	5%
Copper			
below US\$4,500	norm value	5.5%	4%
between US\$4,500 and 5,999	norm value	6.5%	5%
between US\$6,000 and 7,499	norm value	7.5%	6%
between US\$7,500 and 8,999	norm value	8.5%	6%
over (inclusive) US\$9,000	norm value	10%	6%

Applicable fiscal regime in 2017

Applicable fiscal incentives in 2017

Tax advantages available for mining operators can be summarised as follows

Fiscal regimes	Key incentives
CIT	the normal CIT rate is 35 per cent, mining companies carrying out mining operations (for both base metals and Industrial minerals) are taxed for CIT purposes at 30 per cent
WHT	Withholding tax on dividends paid by mining companies is zero per cent whereas it is generally 15 per cent or 20 per cent for other companies depending on whether the recipient is a resident or non-resident

¹⁷ Norm Value - this is the quantity of the metal sold multiplied by the monthly average cash price per metric tonne of the metal as published by London Metal Exchange (LME) or London Metal Bulletin (LMB) or any exchange approved by Commissioner General where the metal is not published by LME and LMB.

¹⁸ Gross Value - this is the realised price free on board at the point of delivery within Zambia or at point of export from Zambia.

Fiscal regimes	Key incentives
Royalty deferment	This option is available under the Mines Act, in that the Commissioner-General may, on application by the holder of the mining right, defer payment of royalty due from the holder if, during any period for which a payment of royalty is due the cash operating margin of the holder in respect of mining operations in the mining area falls below zero.
US dollar accounting	Mining companies may be allowed to maintain account books in US dollars in accordance with generally accepted accounting principles if the Commissioner-General is satisfied that not less than 75 per cent of the gross income is earned in the form of foreign exchange from outside Zambia.
Prospecting expenditure deductions	All prospecting expenditure incurred in a charge year is allowed as a deduction.
Mining expenditure	A deduction is allowed in respect of the capital expenditure incurred on a mine that is in regular production in the charge year.
Capital allowances	<ul style="list-style-type: none"> • Capital expenditure deduction at 25% for mining operations. • Capital expenditure deduction of 50% on implements, plant and machinery on business exclusively carryout mineral processing. • Capital expenditure deduction at 100% for companies carrying out mineral exploration and prospecting operations.
Carry-forward loss	<ul style="list-style-type: none"> • Tax loss carry forward period of 10 years for businesses carrying out mining operations. • Utilisation of brought forward losses limited to 50% of the taxable profit where a company carrying mining operations has posted a profit in a year. The 50% taxable profits are subject to tax in that year. • Tax loss carry forward period of 5 years for; (a) prospecting and exploration operations and (b) exclusive mineral processing.

3.4 Environmental regulation

The principal environmental health and safety laws applicable to the mining industry are:

- the Environmental Act Management Act No. 12 of 2011;
- the Forest Act No. 4 of 2015;
- the Occupational Health and Safety Act No. 36 of 2010;
- the Mines and Minerals (Environmental) Regulations No. 29 of 1997;
- Petroleum (Exploration and Production) Act 2008; and
- the Environmental Protection and Pollution Control (Environmental Impact Assessment) Regulations SI No. 28 of 1997 (EIA Regulations).

The principal regulatory bodies responsible for administration of the environmental, health and safety protection regulatory framework are:

- ZEMA;
- the Ministry (Mines Safety Department); and
- the Occupational Health and Safety Institute.

Environmental review and permitting process

The EIA Regulations specify that any person who, or entity that, proposes to undertake a new project which under the EIA Regulations requires an environmental impact assessment (EIA) to be undertaken must have an EIA conducted before the commencement of the project. The EIA regulations specify that the holder of a mining right is required to have approved environmental authorisation from the Zambia The Zambia Environmental Management Agency (ZEMA).

The ZEMA, formerly known as the Environmental Council of Zambia (ECZ), is an independent environmental regulator charged with ensuring the sustainable use of the country's natural resources. ZEMA's mandate is outlined in the Environmental Management Act of 2011 that covers "all matters affecting the environment from pollution to waste disposal." The ZEMA was established in 2011 to address concerns around there being multiple regulators for environmental resources and low penalties that did not discourage breaches. ZEMA assess the Environmental Impact Studies (EIS) submitted by mining companies in accordance with the procedures in the EIA

Regulations and eventually issue a decision stating that the project is approved, rejected or approved subject to the developer meeting certain conditions.

The process of obtaining the approval of the mining project can take between six weeks and several months owing to the time required for public hearings and the relevant notifications and waiting periods related to it.

Closure and remediation process for a mining project

The closure procedure of a mining project is fully set out in the Mines and Minerals (Environmental) Regulations (the Regulations). Under the Regulations, closure of a mine can only occur where the applicant has applied to the Director of Mines safety for a partial or complete closure of a mine. The application must include an audit report on the environment surrounding the mine site prepared by an independent person.

A mine site should stand closed within 60 days of an application. Once all the conditions of closure under the Regulations have been met, the Director of Mines safety is required to issue a closure certificate for any mine closed and the mining right or permit or part thereof is to be cancelled by the Minister.

The Mines and Minerals (Environmental Protection Fund) Regulations provide for refunds to holders of licences, on application, when a mine site is closed. In accordance with the Regulations, this amount would be less any monies owing. The Director of Mines Safety may use any part of the contribution to the fund of a licence holder for the purposes of rehabilitating the site.

Environmental Protection Fund

The Government enacted the Mines and Minerals Development Act 2008, which stipulates that an Environmental Protection Fund (EPF) should be set up. This legislation provides for contributions to EPF by mine operators in form of cash as well as other forms of security. The new MMDA 2015 has renewed the same provisions for this fund in its Section 86.

EPF has been set up with the appointment of EPF committee members by the Minister of Mines. It aims to:

- provide assurance to the Director of the Mines Safety Department (MSD) that the developer shall execute environmental and social impact statements in accordance with the Mines and Minerals (Environmental) Regulations 1997; and
- provide protection to the Government against the risk of having the obligation to undertake the rehabilitation of mining areas where the mining licence holder fails to do so.

The contributions to the fund are dependent on the environmental audits on the mining firms that are enforced by the Director of Mine Safety. The audits are conducted to ascertain the extent of the environmental liability caused by each individual mining firm.

According to the committee on lands, environment and tourism on the auditor general's, the EPF, put in place by the Government, had not worked effectively. Mining companies were not complying with the EPF's regulations in that the majority were not paying the stipulated contributions. For those that had issued the bank guarantees and bonds, the bank guarantees or bonds were not validated by BoZ as per investment policy.

The MSD had failed to enforce sanctions on defaulters to the Fund. The operation account was not functional, and the hedging strategy put in place to ensure time value of money for the Fund was maintained was also poor. Only bank interests had been used as a hedging strategy thus not taking advantage of the full array of options the Fund's investment policy provides for. The MSD had also failed to appoint a competent External Fund Manager.¹⁹

Recently, the MSD has revealed that an investment policy for the management of the Environmental Protection Fund (EPF) has been drafted to guide the investment decisions of the Fund. The policy is yet to be signed by the Minister of Finance. It is hoped that the policy will energise the fund administrators to explore more investment opportunities beyond the current practice of placing of investments on fixed term deposits with various financial institutions.

Mining and Environmental Remediation and Improvement Project

The Government of the Republic of Zambia has commenced implementing a project on mining and environmental remediation. The objective of the Zambia Mining and Environmental Remediation and Improvement project (ZMERIP) is to reduce environmental health risks to the local population. The project is being implemented through various government agencies such as municipal authorities in critically polluted mining areas of Chingola, Kitwe, Mufulira and the lead exposed areas of Kabwe.

¹⁹ Report of the committee on lands, environment and tourism on the auditor general's report on environmental degradation caused by mining activities for the fourth session of the eleventh national assembly appointed on 25th September, 2014 http://www.parliament.gov.zm/sites/default/files/documents/committee_reports/Report%20-%20Auditor%20General's%20Report%20-%20Environmental%20degradation.pdf

The intervention in Kabwe will involve Blood Lead Level (BLL) testing of affected children and subsequent treatment and provision of food supplements. To support this intervention, rehabilitation and development of environmental infrastructure in the affected areas will be undertaken. This includes the Kabwe Canal and the proposed Engineered Sanitary Landfill as well as clean-up of contaminated hotspots in the area.

To achieve this objective and sustain the interventions, the Project has an in-built Livelihood and Income Generation plan which is targeted at vulnerable members of affected communities. This is a unique initiative which is planned to complement interventions in the four municipalities.

The Project will also focus on improvement of the regulatory framework which relates to mining and the environment and will capacity build the Mines Safety Department and the Zambia Environmental Management Agency (ZEMA).

The project has three major components which focus on remediation of contaminated hotspots and improvement of environmental infrastructure, enhancing institutional capacity for environmental governance and compliance, and reducing environmental health risks through localised interventions.

The Government has in the past implemented interventions to remedy the impact of mining on the environment. One such example is the Copperbelt Environmental Project (CEP) which closed in 2011.

The ZMERIP is a five-year World Bank funded project with a total sum of USD 65.6 million.²⁰

3.5 Licenses

3.5.1 Types of mining rights

The right to explore or produce minerals is authorized by a mining right or a lining license granted under the Mines and Minerals Act.

The following are the types of licenses that are available for small scale and large-scale mining operators:

Table 6: Type of mining rights

Mining right	Area in cadastre units*	Area in ha	Duration	Rights conferred
Large Exploration Licence	Min 301 Max 59 880	200,000ha (2,000km ²)	4 years renewable for two periods of 3 years*	The exclusive rights to carry on exploration in the exploration area for the minerals specified in the licence and to do all such other acts and things as are necessary for, or incidental to, the carrying on of those operations.
Small Scale Exploration Licence	Min 3 Max 300	10,000ha	4 years renewable for two periods of 3 years**	
Artisanal Mining Right	Min 1 Max 2	6.68ha	2	The exclusive rights to carry on mining, processing and exploration in the mining area and to do all such other acts and things as are necessary for, or incidental to, the carrying on of those operations.
Small Scale Mining Licence	Min 3 Max 120	400ha (4km ²)	10	
Large Scale Mining Licence	Min 121 Max 7 485	25,000ha (250km ²)	25	

*A holder of an exploration licence shall relinquish fifty percent of the exploration area at each renewal

**Exploration licence for small-scale exploration and gemstones, other than diamonds, is not renewable.

In addition, the following non-mining rights can be granted under the Mines and Minerals Development Act in Zambia:

Table 7: Type of non-mining rights

Non-Mining right	Area in cadastre units	Area in ha	Duration in years	Rights conferred
Mineral Processing License	Max 7 485	25,000ha (250km ²)	25 years	The exclusive rights to carry out mineral processing in the mineral processing area of the minerals specified in the licence and to do all such other acts and things as are necessary for, or reasonably incidental to, the carrying on of those operations.

²⁰ <http://www.worldbank.org/en/news/press-release/2016/12/16/zambia-world-bank-approves-1056-million-for-environmental-remediation-and-agribusiness-development> / <http://www.worldbank.org/en/news/loans-credits/2016/12/16/zambia-mining-and-environmental-remediation-and-improvement-project>

Non-Mining right	Area in cadastre units	Area in ha	Duration in years	Rights conferred
Mineral trading permit			3 years renewable	The exclusive rights to trade in minerals
Mineral import & Mineral export permits	N/A	N/A	1 year limited to the quantities specified on the permit.	The exclusive rights to import or export any mineral, ore or mineral product.
Gold panning certificate	N/A	N/A	2 years renewable for 1 further period	The exclusive rights to pan for gold and shall be issued only over areas specified by geographical coordinates along water courses and bodies.

Table 8: Active licences 2017

According to the Mining Cadastre data, there were 1,501 active mining rights in 2017 compared to 2,336 in 2016. The types of rights are set out in the table below:

Type	Description	Active License	
		2017	2016
AMR	Artisanal Mining Right	42	137
LEL	Large Scale Exploration Licence	500	753
LML	Large Scale Mining Licence	97	114
MPL	Large Scale Prospecting Licence	13	5
PL	Prospecting Licence	2	-
SEL	Small Scale Exploration Licence	433	757
SML	Small Scale Mining Licence	405	570
LGL	Large Scale Gemstone Licence	7	-
SGL	Small Scale Gemstone Licence	1	-
PP	Prospecting Permit	1	-
Total		1,501	2,336

Source: MMD

The register of mining licenses is publicly available on: <http://portals.flexicadastre.com/zambia/>. These licenses are detailed in Annex 5 of this report.

3.5.2 Mining rights allocation process

All mining rights are acquired in accordance with the provisions of the Mines Act. Mining rights under the Mines Act consist of a mining licence or an exploration licence. A person may therefore only prospect for minerals or carry on mining operations under the authority of a mining right granted under the Mines Act.

All mining rights are acquired by application to the director of mines cadastre by submitting a prescribed form and paying the prescribed fee by either an individual or a company.

Mining rights are granted on a first-come, first-served basis by either the director of mines or the director of geological survey, where the application meets the requirements of the Mines Act or through a competitive bidding²¹.

a. First-come, first-served process

The act sets up two cadastre offices - one at the central level (to process applications for mining rights) and one at the provincial level (to forward applications to the central office).

The Mining Cadastre Office receives, processes and administers applications for mining rights and mineral processing licenses; and maintains public cadastral maps and cadastre registers.

The following procedure is followed for each application:

- (i) Application
 - client submits application forms, duly filled in with coordinates in prescribed format with application fee;
 - client countersigns against an assigned number in the appropriate Register;
 - a physical file is opened by an officer; and
 - the application is recorded electronically.

²¹ MMDA 2015 - Section 19

(ii) Evaluation and validation

The application should go through a validation process which checks whether:

- the shape complies with the grid prescribed;
- the area falls within the prescribed limit;
- the area applied for is free; and
- the applicant has priority over the area applied for.

Once the application has been validated, it is submitted to the Mining License Committee (MLC)²², which is responsible for grant, renewal, termination, suspension, cancellation and amendment of mining and non-mining rights.

MLC comprises the following persons:

- (a) the Director of Mines;
- (b) the Director of Geological Survey;
- (c) the Director of Mines Safety;
- (d) the Director of Mining Cadastre who shall be secretary;
- (e) one representative each of the Ministries responsible for:
 - the environment;
 - land;
 - finance; and
 - labour; and
- (f) a representative from:
 - the Attorney-General Office;
 - the Zambia Development Agency; and
 - the Engineering Institution of Zambia.

The criteria considered when assessing the application for a mining exploration and exploitation permit are described respectively in Sections 22 and 31 of the MMDA 2015 and are presented in Annex 8.

(iii) Licence Grant

Committee shall, within 90 days of the receipt of an application, grant the applicant a mining licence if the application meets the requirements

When the allocation of mining titles is governed by the principle of "first in time, first in right" and in the case where more than one person apply for a mining right over the same area of land, the Committee shall dispose of the applications in the order in which they are received²³.

The Director of Mining Cadastre shall, where an application is rejected, inform the applicant of the rejection and give the reasons for the rejection in writing.

During 2017, 472 licenses were granted. The types of rights granted are set out as follows:

Type	Description	2017	
		Granted Licences	Number of Holders*
AMR	Artisanal Mining Right	41	33
LEL	Large Scale Exploration Licence	226	162
LML	Large Scale Mining Licence	3	3
MPL	Large Scale Prospecting Licence	7	7
SEL	Small Scale Exploration Licence	170	130
SML	Small Scale Mining Licence	25	16
Total		472	327

Source: MMMD

* the same entity may hold two types of rights.

These licenses are detailed in Annex 5 to this Report.

According to the letter issued by the Mining Cadastre Department and dated 12 December 2019, the awarding of mining licences in 2017 was done on first-come, first-served basis and according to the criteria set out in section 22 and 31 of the MMDA 2015. The letter confirms also that there were no deviations from the applicable legal and regulatory framework governing licence awards for the period concerned. The letter is presented in Annex 11 to this Report.

²² MMDA 2015 - Section 6

²³ MMDA 2015 - Section 15

We understand that the Office of the Auditor General carried out a compliance audit on the awarding and monitoring of mining rights for 2017. However, the related report is not yet published.

b. Competitive bidding process

In accordance with the new MMDA, auctioning shall be undertaken in areas where known mineral resources exist. The Minister shall issue invitations for bids for mining rights over identified areas or mineral resources which are not subject to mining rights or non-mining rights²⁴. In this case, the following procedure is followed:

Stages	Procedure
1. Notice publication	The notice is published in a newspaper of general circulation in Zambia
2. Bids Invitation Notice	The notice is issued by the Minister of Mines and shall include : <ul style="list-style-type: none"> - a description of the areas with map and geographical coordinates for which the bids are to be solicited; - the procedures and rules relating to the submission of the bids; - the period within which the bids shall be submitted.
3. Bids submission for evaluation	The Minister shall set up a technical committee to evaluate bids The Minister shall, within fourteen days from the date of the expiry period, refer the bids for evaluation by the technical committee set up.
4. Bids Evaluation	The technical committee shall consider the following in evaluating the bids: <ul style="list-style-type: none"> - the bidder's investment and financial plans; - in the case of a holder of a mining right, whether the holder has been compliant with the provisions of this Act and the terms and conditions of the mining right; - the bid price; and - any other relevant matters for purposes of this Act. The technical committee shall provide a detailed analysis of all the bids, ranked in accordance with pre-determined parameters, and recommend to the Committee the bidder with the highest score to be granted the relevant mining right in accordance with the provisions of this Act.
5. Granting of Licences	The MLC shall, upon receipt of the recommendation by the technical committee, grant a mining right to the recommended bidder in accordance with the provisions of this Act.

According to the Cadastre Department no bidding has taken place to date since the enactment of the MMDA 2015.

3.5.3 Mining rights transfers and renewal

The renewal and transfer of rights relating to exploration, and mining licences is governed by the provisions of the Mines Act and the Mines Regulations. The Mines Regulations provide guidelines for the renewal of a mining right and mineral processing licence, which is a non-mining right under the Mines Act.

Process of renewal

An application for renewal of a mining right or mineral processing licence is made as follows:

- in the case of an exploration licence, six months before expiry of the existing licence;
- in the case of a mining licence, three months for an artisanal licence, six months before expiry for a small-scale mining licence and one year before expiry in the case of a large-scale mining licence; and
- renewal of a mineral processing licence must be made one year before the expiry of the licence.

Applications for a renewal of a mining right or mineral processing licence must be made in the prescribed form and submitted to the mining cadastre office.

Process of transfer

The process for transferring or assigning a mining right or mineral processing licence is also provided for in the Mines Act and Mine Regulations. The statute considers three means of transfer or assignment.

- the transfer of a mining right or mineral processing licence; or
- the transfer or assignment of a share or shares in a company that holds a mining right or mineral processing licence; or
- the transfer of control of a company that holds a mining right or mineral processing licence.

²⁴ MMDA 2015 - Section 19

Transfer of mining or mineral processing licence

The transfer, assignment, encumbrance or otherwise deal with a mining right or a mineral processing licence, or an interest in a mining right or a mineral processing licence, is subject to the prior approval of the Minister and the presentation of a tax clearance certificate.

A holder of a mining right or mineral processing licence or a person with an interest in a mining right or mineral processing licence who intends such operations shall apply for approval by the Minister and give such details of the transferee as would be required in an application for a mining right or mineral processing licence upon payment of the prescribed fee²⁵.

Transfer of a mining right without first obtaining the consent of the Minister as required by the Mines Act renders such transfer void.

An assignment or transfer can be made at any time during the tenure of the right, but not less than 120 days before the expiry of the licence, and must be accompanied by an application for a mining right (or mineral processing licence) for the prospective assignee or transferee.

The MMDA 2015 states that a holder of a mining right or mineral processing licence or interest in the mining right or mineral processing licence shall, in the transfer application give to the Minister such details of the transferee as would be required in an application for a mining right or mineral processing licence. This implies that the same criteria considered when assessing the application for a mining exploration and exploitation permit as described respectively in Sections 22 and 31 of the MMDA 2015 are applicable for transfers. These criteria are detailed in Annex 8.

During 2017, 34 licenses were transferred. The types of rights transferred are set out as follows:

Type	Description	2017	
		Transferred Licences	Number of Holders*
LEL	Large Scale Exploration Licence	8	7
LML	Large Scale Mining Licence	5	3
LPL	Large Scale Prospecting Licence	1	1
SEL	Small Scale Exploration Licence	10	7
SML	Small Scale Mining Licence	10	10
Total		34	28

Source: MMMD

* the same entity may hold two types of rights.

These licenses are detailed in Annex 6 to this Report.

According to the letter issued by the Mining Cadastre Department and dated 12 December 2019, the transfers of mining licences was done according to the provisions of section 66 of the Ministry of Mines and Minerals Development Act (MMDA) 2016. The letter confirms also that there were no deviations from the applicable legal and regulatory framework governing licence transfers for the period concerned. The letter is presented in Annex 11 to this Report.

Transfer of control of company

Furthermore, a holder of a mining right or mineral processing licence shall not, after the date of the grant of the right or licence, without the prior written approval of the Minister:

- register the transfer of any share or shares in the company to any person or that person's nominee if the effect of doing so would give that person control of the company; or
- enter into an agreement with any person, if the effect of doing so would be to give that person control of the company.

Section 67 of the MMDA 2015 stipulates that a person is deemed to have control of a company:

- if the person or that person's nominee holds, or the person and that person's nominee together hold, a total of 50% or more of the equity shares of the company; or
- if the person is entitled to appoint, or to prevent the appointment of, half or more than half of the number of Directors of the company.

According to the cadastre department, there is no record on transfers of control of companies during 2017.

²⁵ MMDA 2015 - Section 66

3.5.4 Oil and Gas rights

3.5.4.1 Type of oil and gas rights

The Petroleum (Exploration and Production) Act, 2008 (the “Petroleum Act”) provides that all property and control over petroleum and accompanying substances, in whatever physical state, located in Zambia is vested in the President on behalf of the State.

In order to acquire exploration rights, a person qualified to hold exploration rights prescribed by the Petroleum Act is required to respond to a Gazette notice issued by the Minister of Mines, Energy and Water Development (the “Minister”) in two newspapers of general circulation in Zambia inviting bids for the grant of petroleum exploration licences in respect of any block or blocks specified in such notice.

We understand that that is no licence granted in 2017. The table below shows the various companies granted petroleum exploration licences in Zambia:

Table 9: List of Petroleum companies 2017

Petroleum Exploration companies	Block number(s)	Licence Numbers	Grant/ Renewal dates	Expiry Dates	Status
Tullow Zambia B.V. Limited	31	PEL 028	09/05/16	08/05/20	Pending Transfer Application

The register of oil and gas licenses is publicly available on: <http://portals.flexicadastre.com/zambia/>.

3.5.4.2 Contract and Licence allocations process

In accordance with the Petroleum Act 2008, the blocks are licenced in Zambia through a competitive bidding. The main stages of granting a petroleum exploration licence involve the constitution of blocks, advertisement and application, evaluation and recommendation, licence offer and licence grant.

(i) Constitution of Blocks

Prior to licensing, the Minister of Mines and Minerals Development, with the approval of the Petroleum Committee, shall divide the territory of the Republic of Zambia into blocks for the purpose of granting petroleum exploration licences according to the grid system. This is in accordance with Section 8 (1), Part II of the Petroleum (Exploration and Production) Act, 2008.

(ii) Advertisement and Application

Thereafter, by notice in the Gazette and in two (2) newspapers of general circulation in the Republic of Zambia, the Minister of Mines and Minerals Development may issue invitations for bids for the grant of a petroleum exploration licence in respect of any constituted block or blocks specified in the notice in accordance with Section 9 (1), Part II of the Petroleum (Exploration and Production) Act, 2008. The blocks are then advertised in the local press for a period specified by the Petroleum Committee and bids received in tender box which is immediately opened in the presence of applicants.

(iii) Evaluation and Recommendation

After closing the tender, the tender box is immediately opened in the presence of applicants.

Within five days, the application should be forwarded to the technical committee for consideration. The Technical Committee shall within thirty days of receiving an application forwarded, consider such application and may, within that period, cause such investigations to be made or such consultations to be carried on as the Technical Committee may consider necessary to assess whether or not the criteria have been met.

The Petroleum Technical Committee (PTC) evaluates the submitted bids based on information requested from bids. Specifically, the information requested, among others, includes financial status, technical competence and experience. The Petroleum Technical Committee evaluates the bids and recommends the highest scoring bid to the Petroleum Committee (PC) for an offer. The Minister, within five (5) days then notifies the successful and unsuccessful bidders of the outcome of their bids.

(iv) Licence Offer and Grant

The highest scoring bidder is invited to apply for the block(s). When the application (s) is received it is referred to the Petroleum Technical Committee for an evaluation and thereafter a recommendation is made to the Petroleum Committee for the granting or non-granting of the petroleum exploration licence. The Petroleum Committee finally grants the licence based on the recommendation. The petroleum exploration licence is valid for four (4) years and is renewable for two (2) three (3)-year terms.

(v) Government Reserved Petroleum Blocks

Government of Zambia may participate in petroleum exploration and production by acquiring reserved block. Specifically, the Minister of Mines and Minerals Development may reserve blocks to be exploited by the Government in accordance with Section 8(2), Part II of the Petroleum (Exploration and Production) Act, 2008. Currently, ZCCM Investments Holdings Plc. (ZCCM-IH), is a Government investment vehicle in the upstream petroleum sector over the Government petroleum blocks. ZCCM-IH partners with investors for the purpose of spearheading petroleum exploration and development in Government blocks.

According to the register of oil and gas licenses publicly available, there were no petroleum blocks allocated to ZCCM-IH in 2017.

3.5.4.3 Licence Transfers process

Applications for transfers of petroleum exploration licences are made in accordance with Section 51, Part VIII of the Petroleum (Exploration and Production) Act, 2008. With the approval of the Minister of Mines and Minerals Development, any holder of a petroleum exploration licence can at any time transfer the licence.

3.5.4.4 The technical and financial criteria used

As part of the application procedure, it is a requirement that the prospective petroleum exploration licence holder, bidder, submits in a bid of the company's technical and financial competence. During bid evaluation, the bid with the highest score is offered to apply for a petroleum exploration licence. In addition, the financial commitment made by a prospective petroleum exploration licence holder becomes an obligation in accordance with Section 17 (1) c, Part VIII of the Petroleum (Exploration and Production) Act, 2008. The petroleum exploration licence holder is obliged to expend on exploration operations not less than the amount prescribed or required by the terms and conditions of the exploration licence to be so expended.

The information required from bidders and that are subject to evaluation are detailed as follow:

- full information regarding the bidder's financial status, technical competence and experience;
- a description of the area constituted by the blocks in respect of which the bid is being made;
- the proposed programme and the estimated cost of exploration operations including:
 - a) Desktop study;
 - b) Aerial/ground survey;
 - c) Exploratory drilling;
 - d) Evaluation and appraisal; and
 - e) Feasibility study.
- the bidder's proposals with respect to the employment and training of citizens of Zambia;
- the bidder's proposals for the promotion of local business development;
- an environmental commitment plan including:
 - a) Identification of anticipated impacts

- b) Proposed mitigation measures; and
- c) Timeline for submission of the Strategic Environmental Assessment report to the ZEMA (Within twelve months from date of grant of license).
 - a tax clearance certificate issued under the Income Tax Act.

The Petroleum Technical Committee (PTC) evaluates the submitted bids based on information above and taking the following into account:

- that the applicant has, or has secured access to, adequate financial resources, technical competence and experience to carry on effective exploration operations;
- that the proposed programme of exploration operations is adequate and makes proper provision for environmental protection;
- that the proposed exploration area is not the same as, nor does it overlap an existing exploration area; and
- if the applicant is a holder of another petroleum exploration licence, the applicant has not contravened any condition of the licence or any provision of this Act.

The Technical Committee shall, after considering an application, recommends to the Petroleum Committee:

- the grant of a petroleum exploration licence where the application meets the requirements above; or
- the refusal to grant a petroleum exploration licence where the application does not meet the requirements.

The standard Evaluation Criteria for Bids for Petroleum Exploration Licence are detailed in Annex 7.

Three licencing rounds have so far been held in 2011, 2013 and 2016. Accordingly, seventeen licences were issued in 2011, nine in 2013 and two in 2016. We understand that no bidding round has been held during 2017. Further details on the bidding round held in 2016 and in previous years can be found in 2016 ZEITI Report²⁶.

3.5.5 Disclosure of Licenses, Contracts and data

Under the MMDA 2015; mining companies operate under a common legislative framework. The terms for mining license holders are outlined in the MMDA 2015 and information on mining licenses can be obtained from the online mining cadastre.

According to the MMDA 2015 provisions, information furnished or information in a report submitted to the Minister, Committee, Director of Mines, Director of Mines Safety, Director of Mining Cadastre or Director of Geological Survey or any authorised officer under or for the purposes of this Act by a holder of a mining or non-mining right shall not, for so long as the mining or non-mining right has effect over the land to which the information relates, be disclosed, except with the consent of the holder of the mining or non-mining right. In practise, some license certificate, environmental impact assessment are dated before the coming into force of the MMDA 2015 are available on line: <https://www.resourcecontracts.org/countries/zm>.

The MMMD is both the repository and depository of information and data for the mining sector. All mining and exploration activities are required to be collected and lodged by mining right holders with the Ministry. The MMMD and Trimble Land Administration have developed an online Mining Cadastre Portal to improve transparency and promote investment in the Zambia mining sector. Basic information and data on mining activities and mineralisation are available at <http://portals.flexicadastre.com/zambia/>. This interface provides information such as details of mining licences that are active in Zambia. It allows to see the licensed areas, all assigned mining titles, beneficiaries and the type of product, the date of the license application, the date of attribution and the validity of the license.

The Zambian Petroleum sector is structured as a licence system rather than as a contract regime and production sharing system. The rights and obligations of licensees are governed principally by the terms and conditions of the licence, and the legislation listed above. All companies are using conditions attached to exploration licenses since the Petroleum legislation 2010 is drafted. The petroleum licenses are listed in the online cadastre.

²⁶ <https://eiti.org/document/zambia-2016-eiti-report>

3.6 Contribution of the Extractive Industry to the Economy

Since independence in 1964, the mining industry has provided the traditional base for the country's foreign exchange earnings and continues to be the major contributor to export receipts, accounting for more than 80% of Zambia's export earnings by 2017. The mining sector and its support industries provide major employment and the infrastructure backbone to areas that would otherwise lack the impetus for sustained development.

3.6.1 Foreign Direct Investment (FDI)

Since the early 2000s, the mining sector has attracted investment in excess of USD 8 billion. It is projected that investments in the mining sector will reach approximately USD 15 billion on account of new projects under implementation and/or exploration by the year 2020 if the international average metal prices hold above those recorded in the year 2014.²⁷

For 2017, the total investment pledges had highly increased to US\$17.4 billion and the investment pledges on the mining sector increased only by US\$ 0.033 billion (17.74%) compared to 2016.

The mining sector investments pledges over the past three years are detailed as follow:

	2017 (US \$ million)	2016 (US \$ million)	2015 (US \$ million)
<i>Investment pledges from mining sector</i>	219	186	43
Total of Sectors	17,402	3,350	3,213
% contribution of mining sector to the investment	1.26%	5.55%	1.34%

(Source: Bank of Zambia, 2017, p. 23)

3.6.2 Government revenues and GDP

Total government revenue and grants in 2017, at ZMW 43.0 billion, were 1.0% lower than the target of ZMW 45.3 billion. This outturn was largely attributed to lower collections in income tax, international trade taxes and non-tax revenue. Domestic revenue accounted for 99.0% of the total revenue i.e. ZMW 42.6 billion.

The total revenues collected from the mining companies increased by ZMW 2.1 million compared to 2016. The contribution to the total domestic revenues (Tax and non-tax revenues) increased also to more than 29%.

	2017 (ZMW billion)	2016 (ZMW billion)	2015 (ZMW billion)
<i>Total taxes collected from mining sector*</i>	12.4	10.3	9.1
Total domestic revenues collected **	42.6	38.9	34.1
% contribution of mining sector to the revenues	29.1%	26.4%	26.6%

* EITI data

** Bank of Zambia, 2017, p. 19

The Zambian GDP (at constant prices) grew by 3.8% between 2016 and 2017. In the meantime, the mining and quarrying GDP's grew by ZMW 0.4 billion equivalent to 2.9%. Despite this relative increase, the contribution of the sector to the overall GDP's decreased by 0.1%.

	2017 (ZMW billion)	2016 (ZMW billion)	2015 (ZMW billion)
<i>Mining and quarrying GDP at constant prices</i>	14	13.6	12.7
GDP constant prices	134.3	129.3	125.0
% contribution of mining sector to the GDP	10.4%	10.5%	10.2%

Source: CSO, National Accounts Statistics

²⁷ Zambia Development Agency, Zambia Mining Sector Profile, July 2015

In terms of contributions to growth, mining sector remain among the largest contributor as shown in the figure below.

Figure1: Drivers of Zambia's GDP Growth

Source: CSO, National Accounts Statistics

3.6.3 Exports

The extractive sector accounts on average for almost 80.4% of exports earning 2017 with a large contribution of Copper which accounts for over 92% of the total sector exports as shown in the table below:

	2017 (US \$ million)	2016 (US \$ million)
Mining and quarrying Exports	6,607.1	4,803.9
Zambia Exports (f.o.b)	8,215.5	6,534.8
<i>% contribution of mining sector to Exports</i>	80.4%	73.5%

Source: BoZ annual report 2017, p.14-15

3.6.4 Employment

According to the Labour Force Survey published by the Central Statistical Office²⁸, The mining companies employs directly about 58,007 individuals representing 2.0% of total Country's 2017 employed persons of 2,791,170. The youth²⁹ employment by the sector has reached the number of 25,006 employees in 2017.

The table below summarizes the number and percentage distribution of employed persons (15 years or older) by Gender, Area and Type of employment in the mining and quarrying sector:

Male		Female	
54,171	93.4%	3,836	6.6%
Rural		Urban	
9,250	15.9%	48,757	84.1%
Formal		Informal	
51,571	88.9%	6,436	11.1%

3.7 Production and Exports

3.7.1 Production data

a. Oil and Gas

Oil and Gas sector in Zambia is still in the exploration phase. There was no production in the period under review.

b. Mining³⁰

The Zambian mining production can be captured from different sources. The different sources may have minor differences in production volume for some commodities. However, the value of production is not presented exhaustively for all types of minerals.

According to the Mines Development Department, there is a challenge in obtaining complete and accurate data from the small-scale mines due to the fact that some small-scale mines were not reporting monthly mineral production returns to the ministry.

However, new online reporting system and other measures being put in place as part of the implementation of the Mineral Production Monitoring Support Project to address these problems. The objective of the MPMS is “to strengthen the ability of the Ministry of Mines and Minerals Development (‘MMMD’) to fulfil its mandate as mining authority to monitor effectively mining activities and mineral production in Zambia, and to share this information with other relevant Government of Zambia agencies to increase domestic revenue mobilisation.”³¹

The project works closely with Mineral Value Chain Monitoring Project (MVCMP) whose aim is to design and implement a multi-institutional, multi-purpose and multi-stakeholder system for monitoring of the country’s mineral value chain from exploration to export.

The MVCMP also serves as a tool in development of Zambia’s National Statistical System in that it aims to improve the quality and availability of administrative registers that can be used in production of official statistics pertaining to the mining sector.³²

We present below the values from the annual report of the Ministry of Finance and those provided by the MMMD.

(i) Production Data extracted from the Annual report of the Ministry of Finance³³:

Copper Production

Copper production in 2017 increased by 3.5 % to 797,266 Mt from 770,588 Mt in 2016. Copper output by small scale mines increased by 59.4 % to 5,900.7 Mt from 3,702.1 Mt in 2016.

Further, a total of 145,905 Mt of copper concentrates and 4,725 Mt of cobalt ores and concentrates was imported in 2017 by mining companies for purposes of processing at local smelters.

Coal Production

Coal production in 2017 increased by 30.6 % to 77,500 Mt from 59,353 Mt recorded in 2016. The increase in coal production was due to the rise in demand for the commodity for electricity generation and industrial activities.

Gemstone Production

Emerald and Beryl production reduced to 58,622 kgs in 2017 from 74,742.2 Kgs in 2016. Total production of Amethyst, Quartz, Garnet, and Aquamarine reduced to 1,446,488.22 kgs in 2017 from 2,090,726.50 kgs in 2016. The decline was partly due to inadequate capitalisation in the sector especially by small scale miners. During the period, total sales of US \$ 84 million were recorded representing a 19.7 percent increase from US \$ 70.2 million in 2016.

Gold Production

According to the data provided by MMMD, Gold production increased by 1.1 % to 4,564.94 kgs in 2017 from 4,514.35 Kgs in 2016. This was largely on account of a higher content of gold in the copper ore. Gold is produced by Kansanshi Mine.

However, according to KANSANSHI MINING PLC, the production of gold amounted to 4,373 kgs down from 4,610 kgs in 2016.

(ii) Production Data provided by the Ministry of Mines and Minerals Development:

The production volume and value for the commodities are set out on the following table:

Commodity	Unit	2017	
		Production Quantity	Value (US \$ million) ³⁴
Copper	Metric tonne (MT)	797,266	4,918.08
Gold	Kg	4,565	183.31
Coal	Tonnes	77,500	n/a
Emerald and Berl	Kg	60,063	n/a
Limestone	Thousand metric tons	23,965	n/a
Quicklime	Thousand metric tons	29,153	n/a
Hydrated Lime	Thousand metric tons	13,650	n/a
Manganese Ore	Metric tonne (MT)	92,675	n/a
Cement	Metric tonne (MT)	2,097,524	n/a
Total of the sector			5,101.39

n/a: not available

3.7.2 Export data**a. Oil and Gas**

Oil and Gas sector in Zambia is still in the exploration phase. There were no exports in the period under review.

b. Mining**Copper³⁵**

In 2017, Copper earnings rose by 39.1% to US\$6,118.6 million largely due to an increase in copper prices on the international market and higher export volumes. The average realized price for copper at US\$5,976.1 per MT, was 27.4% higher than US\$4,689.0 per MT in 2016. Copper export volumes grew by 9.2% to 1,023,859.1 MT from 937,985.0 MT in 2016.

Cobalt³⁶

Cobalt earnings at US\$124.8 million in 2017, were 10.5% higher than US\$112.9 million recorded in 2016. This was driven by an increase in the average realised price, which more than doubled to US\$46,616.3 per MT from US\$22,666.0 per MT despite export volumes declining to 2,676.4 MT from 4,981.8 MT. Refined cobalt originates from imported ores and concentrates.

Gold³⁷

Gold earnings fell by 18.4% to US\$156.1 million on account of the reduction in the average realised price and export volumes.

The table below summarizes the evolution of metal exports between 2016 and 2017:

	2017		2016		Var	
	Volume (MT)	(US \$ million)	(US \$ million)	Value (US \$ million)	%	
Copper	1,023,859.1	6,118.6	4,399.1	1,719.5	39.1	
Cobalt	2,676.4	124.8	112.9	11.9	10.5	
Gold	n/a	156.1	191.2	(35.1)	(18.3)	
Gemstones	n/a	101.8	21.8	80	366.9	
Manganese Ores/Concentrates	n/a	31.3	8	23.3	291.2	
Cement & Lime	n/a	74.5	70.9	3.6	5.1	
Mining exports		6,607.1	4,803.9	1,803.2	37.5

³⁷ Ibid

The table below summarises the evolution of the average realised price per commodity between 2016 and 2017:

	2017 (US \$)	2016 (US \$)	Value	Var	%
Copper (US\$/MT)	5,976.1	4,689.0		1,287.1	27.4
Cobalt (US\$/MT)	46,616.3	22,666.0		23,950.3	105.6

3.8 State participation

Following the completion of the privatisation of the mining sector in Zambia in 2000, mining in the country is predominantly private sector driven. The state transformed the parastatal agency that owned virtually all the productive mines and tenements before 2000 into an investment company known as Zambia Consolidated Copper Mines Investment Holdings (ZCCM-IH), which retains minority interests in most large-scale mining projects.

However, all the large-scale mines in Zambia, as well as most prospective tenements, are in private hands with constitutionally protected title to minerals discovered or won. The state deliberately promotes a policy of a private sector-driven mining industry.

3.8.1 State Owned Enterprises

3.8.1.1 ZCCM-IH

Previously run as a state owned, operational mining company, the Zambia Consolidated Copper Mines (ZCCM) company has been transformed into an investment company. The country has privatised its mineral resources but has retained a share of equity in the mines and manages these investments through the reconstituted ZCCM-IH.

*Structure*³⁸

ZCCM Investments Holdings PLC is an investments holdings company with diversified interests in mining, energy and other sectors of the Zambian economy. The Company has a primary listing under ISIN number ZM0000000037 on the Lusaka Stock Exchange and secondary listings on the London Stock Exchange and the Euronext Stock Exchange in Paris.

The Company's shareholders are the Industrial Development Corporation Ltd (IDC), an investment company wholly owned by the Zambian Government, with 60.28%, the Government of the Republic of Zambia (GRZ) with 17.25% and private equity holders with 22.47%. Minority shareholders are spread in various locations throughout the world.

Governance

ZCCM-IH is led by a Board of Directors whose membership comprises leading figures from private commerce and Government institutions, namely:

- The Chairman and at least one Director who are nominated from the Private Sector;
- Permanent Secretaries (Chief Executive Officers) in the Ministry of Finance & in the Ministry of Mines and Minerals Development;
- Representative of the Minority Shareholders; and
- The Chief Executive Officer of ZCCM-IH.

ZCCM-IH mandate

ZCCM-IH's portfolio consists mostly of shareholdings in some of the largest mines in Zambia. It also has shareholdings in energy companies (CEC & Maamba Collieries Ltd), Financial Services (Investrust) and in Gemstones (Kariba Minerals Ltd).

With its Strategic Partners, ZCCM-IH aims to improve operational efficiencies and drive profitability in its investee companies with the goal of increasing the dividend stream into ZCCM-IH.

Furthermore, ZCCM-IH mandate includes

- Monitoring investee companies to ensure they consistently declare reasonable dividends and achieve company growth;
- Ensuring effective representation on the boards of the investee companies;
- Establishing and securing joint venture partnerships for projects assessed to be viable;
- Establishing metal streaming arrangements;
- Establishing a royalty model to maximize shareholder value; and
- Supply chain participation (including management contracts).

³⁸ <https://zccm-ih.com.zm/structure/>

ZCCM-IH Portfolio in extractive sector

Through its shareholding in mining associate companies, ZCCM-IH serves as an entity holding the government's minority interests in the privatised mining companies. The investment portfolio for ZCCM-IH comprises primarily investments in Zambian mining companies detailed as follows:

Table 10: ZCCM-IH Portfolio in extractive sector

Mining company	Shares held on 31 March 2018(*)	Shares held on 31 March 2017(*)	Shares held on 31 March 2016(*)

Source: ZCCM-IH Annual reports <http://www.zccm-ih.com.zm/investor-center/annual-reports/>

- (a) Mawe Exploration and Technical Services Ltd was a wholly owned subsidiary of ZCCM - IH and was initially the former technical department of the Company. Mawe's principal activity was exploration in mineral oil and gas. The Company commenced trading on 13 February 2014, following incorporation on 2 April 2013. On 24th March 2015, the Board resolved to dissolve Mawe as its expenses had grown significantly and ZCCM-IH's income could not sustain funding of Mawe. Mawe's operations were discontinued and it was formally dissolved in April 2017.

Currently ZCCM-IH appoints directors in line with its percentage holding on all the boards of its associates, and as such its exercise's significant influence over them. For Kariba Minerals, despite ZCCM-IH owning 50% of the mine, it only appoints two of the five Directors that sit on the Kariba Minerals board and as these are not charged with the responsibility of setting strategies to achieve objectives, ZCCM-IH is not deemed to have control of the entity.

The dividends received by ZCCM-IH from shares held are deployed into Investments with above average risk adjusted returns thus continuing to extract more value for its shareholders. Dividends received from CEC reached during 2017 reached a total of 3,563,625 USD.

Other interest in extractive sector

ZCCM-IH is also a holder of various licenses as detailed in Section 3.5.4 and in Annex 5 to this report.

Transactions with the GRZ

We understand from the ZCCM-IH annual report that there were no transactions with the GRZ during 2017. No material sales or purchases of goods or services occurred with the GRZ during the relevant period³⁹.

³⁹ ZCCM-IH 2018 Annual Report, p.101

Loans granted to extractive companies

ZCCM-IH contributes to the direct financing of mining projects. According the company financial reports, funding was granted to its subsidiaries operating in the mining sector; and the terms of the transactions can be summarised as follows:⁴⁰

Table 11: Loans granted by ZCCM-IH to extractive companies

Beneficiary	Terms of the transaction
1. Maamba Collieries Limited	<p>On 17 June 2015, ZCCM -IH entered into an intercompany loan agreement for a cash advance of K254.45 million (US\$26.345 million) as part of its contribution towards the implementation of the Integrated Mining Project and the establishment of the 300MW Thermal Power plant project.</p> <p>The loan attracts an interest rate of 6 % per annum. The principal and interest accrued is repayable in 5 annual instalments commencing in one year after the commercial operational date of 31 December 2016.</p>
2. Lubambe Copper Mines Limited	<p>On 15 September 2012, ZCCM - IH entered into an intercompany loan agreement with Lubambe Copper Mines Limited, for cash call loan amounting to K850 million (US\$76 million). The loans attract an interest rate of Libor plus 5% and is not secured. The loan was to be repaid in twelve equal quarterly instalments, none of which was made. This loan is fully impaired.</p>
3. Ndola Lime Company Limited	<p>The total loans and advances due from Ndola Lime, including interests was K29 million (2015: K516 million) which is fully impaired. During 2017, ZCCM-IH resolved to convert a total of K659 million of the outstanding loans to equity.</p> <p>The advances are not secured over any Ndola Lime Company assets and ZCCM-IH has indicated that it will not demand immediate repayment of these advances.</p>
4. Kariba Minerals Limited.	<p>On 10 December 2012, ZCCM-IH and Kariba Minerals Limited entered into an intercompany loan agreement for a cash advance of K16.43 (US\$1.47) million. Repayment was to commence at the end of the 12 months from the date of disbursement and payable annually. The loan attracts an interest rate of 6 % per annum. As at 31 March 2016, no repayments had commenced. This loan is fully impaired</p>
5. Nkandabwe Coal Mines	<p>During the year, ZCCM-IH advanced a loan to Nkandabwe Coal Mine of K32 million. There are no repayment terms and it is interest free and is not secured. This loan is fully impaired.</p> <p>No additional information has been communicated by ZCCM-IH (i.e. purpose of the loan, etc.)</p>
6. Misenge Environmental and Technical Services Limited	<p>Loans totalling K3 million have no repayment terms and are interest free and are not secured. The loan is not impaired.</p> <p>No additional information has been communicated by ZCCM-IH (i.e. purpose of the loan, etc.)</p>
7. Mawe Exploration and Technical Services Limited	<p>Loans totalling K27 million have no repayment terms and are interest free and are not secured. The loan is fully impaired.</p> <p>On 24th March 2015, the Board resolved to dissolve Mawe as its expenses had grown significantly and ZCCM-IH's income could not sustain funding of Mawe. Mawe's operations were discontinued and it was formally dissolved in April 2017.</p>
8. KONKOLA Copper Mines (KCM)	<p>In 2016, the English High Court granted default judgment in favour of ZCCM-IH in its claim against KCM, brought pursuant to a settlement agreement entered by the parties in 2013, for a sum of US\$103 million. The claim relates to outstanding payments under a 2013 copper price participation settlement agreement between ZCCM-IH and KCM.⁴¹</p> <p>According to Reuters, a London court has later ordered Zambia Vedanta (VED.L) unit KCM to pay a state mining company \$139 million (£102.6 million), raising by \$36 million the amount it was originally ordered to pay.⁴²</p> <p>KCM has paid out about US\$70 million to ZCCM-Investment Holdings (IH) in claims as at December 2017.</p> <p>As at March 2018, the price KCM participation debt amount of K543.31 million (2017: K566.3 million).</p> <p>The balance of K543.31 million dues from Konkola Copper Mine Plc includes K267 million and K277 million payable to ZCCM-IH in 11 and 17 equal monthly instalments respectively at an annual interest rate of 3%.</p>

Guarantees granted to extractive companies

⁴⁰ ZCCM-IH 2018 Annual report, p.102

⁴¹ <http://www.zccm-ih.com.zm/kcm-pays-zccm-ih-70-million/>

⁴² <https://uk.reuters.com/Section/uk-zambia-mining/court-orders-zambia-vedanta-unit-to-pay-state-firm-139-million-idUKKBN1ER0TM>

Beneficiary	Terms of the transaction
1. Ndola Lime Company Limited - SBSA loans	The loan of US\$14.1 million (K134 million) due to Standard Bank of South Africa (SBSA) by the subsidiary Ndola Lime Company Limited is guaranteed by ZCCM-IH. The loan has a carrying interest of 3.5% margin plus 3 months Libor per annum and is repayable in 30 months with interest and principal payable quarterly. In case of loan recall by SBSA or failure by Ndola Lime Company Limited to meet the obligation, ZCCM-IH will be obligated to settle the loan.
2. Maamba Collieries Limited (MCL)	ZCCH-IH has US\$8.5 million letter of credit placed with Standard Chartered Bank on behalf of Maamba Collieries Limited (MCL) as collateral for the obligations of ZCCM-IH under the Sponsor Support Agreement (SSA) in case of MCL Project Cost overrun or MCL is unable to meet operational costs prior to the Financial Completion Date, then ZCCM-IH will be obligated to meet these costs subject to the cap of US\$25 million in the ratio of the shareholding

Profit distribution policy

During its 78th Meeting held on 29 March 2018, the ZCCM-IH Board amended the Company Dividend Policy. The ZCCM-IH Policy now states that the Company may pay a minimum of 35%, instead on 20%, of the unconsolidated Net Profit after Tax (NPAT) for any financial year in which a positive unconsolidated NPAT was recorded. We understand that there no dividend paid by ZCCM-IH in 2017.

Financial reporting and audit

As a listed company, ZCCM-IH is required to prepare annual financial statements in terms of IFRS and subject them to statutory audit, which should be conducted in terms of ISA (the Securities Act 2016 and listing requirements of 2016).

ZCCM-IH's annual audited financial reports are publicly available and include information on reserves, the names of operating companies, royalties, and dividends. ZCCM-IH also publishes information on its board of directors and decision-making rules.⁴³

Procurement policy

The Company's shareholders are the Government of the Republic of Zambia (GRZ) with 77%. This makes ZCCM-IH a parastatal company and therefore its procurements are governed by the Public Procurement Act (PPA) of 2008 No. 12 and the Public Procurement Regulations of 2011 (SI 63).

Fiscal payments

ZCCM-IH operates under the provisions of the Companies Act and it is neither a Government Agency nor a statutory body. Like any other company, ZCCM-IH pays taxes to tax authorities. In total, ZCCM-IH paid ZMW 17,346,569 to the GRZ in 2017, excluding dividends. The detail by payment flows is set out Annex 2.

Social payments

ZCCM-IH policy includes meeting its social its social obligations by supporting health and education programs among others.

During 2017, the company has provided support to Katulumba Community School located in Siavonga district in Southern Province of Zambia in order to improve pre-grade enrolment and increase school attendance particularly for pupils in lower primary grades. ZCCM-IH donated various building materials, desks and textbooks. The school has since been rehabilitated and stocked with key materials for both teachers and learners

During 2017, the Company spent ZMW 137,091 in supporting various corporate social responsibility activities.

3.8.1.2 IDC

Structure & governance

The Industrial Development Corporation (IDC) of Zambia is an investment company wholly owned by the Zambian government. In February 2014, IDC was incorporated as a company limited by shares under the Companies Act. It is 100% owned by the Minister of Finance pursuant to the Minister of Finance (Incorporation) Act Cap 349 of the Laws of Zambia, for the President on behalf of the Government of the Republic of Zambia (GRZ). IDC commenced operations in March 2014.

After the establishment if IDC, it was agreed that all SOEs incorporated under the Companies Act and the Banking and Financial Services Act from the ministry of Finance to the IDC. The corporation was going to hold shares on behalf of Government, supervise and manage all GRZ's shares in the SOEs.

⁴³ www.zccm-ih.com.zm/

IDC operates under the provisions of the Companies Act and it is neither a Government Agency nor a statutory body. Like any other company, IDC pays taxes to tax authorities, distributes dividends to its shareholders and has its own board of directors and a professional management team. Its sole shareholder is Zambia's Minister of Finance.

IDC Mandate

IDC has been given direct mandate and authorisation by the Government of Zambia to oversee performance and accountability of all the Government Owned Enterprises (SOE'S). IDC is mandated to work towards maximising the value of government shareholding and ensure that SOEs contribute to the Sovereign Wealth Fund (SWF) which will focus on stimulating investment in strategic non-mining industries to increase exports.

Among the objectives of the IDC, through its Basic Metals and Mining Strategic Business Unit is to ensure a globally and domestically competitive downstream manufacturing in the metals value chains. The aim is to ultimately contribute towards the creation of a globally competitive and diversified local basic metal and mineral resource industry that produces a significant amount of the metals products and minerals for the local market and the rest of Africa. This should ultimately lead to increased exports of value-added minerals. Accordingly, the Basic Metals and Mining SBU, offers financial assistance, to a range of entities in the basic metals and mining space.

IDC portfolio in extractive sector

IDC owns 100% of KARIBA Minerals, 25% shares in KAGEM Mining limited and 60.3% in ZCCM-IH⁴⁴. The IDC portfolio includes also entities operating in energy, education, agricultures, financial services, technology and logistics. The detail of the portfolio is available on IDC (<https://www.idc.co.zm/industry-sectors/>).

3.8.1.3 Ndola Lime Company

Ndola Lime Company Limited (NLC) is a wholly owned subsidiary of ZCCM-IH. Its mission is to supply Limestone products that satisfy customer requirements to the benefit of all stakeholders. The Company was originally founded on 10th January 1931 as the Northern Rhodesia Lime Company Limited, pursuant to an agreement between the Rhokana Corporation Limited and Mr. John Owen Wallen, an Ndola Engineer to supply lime to the mines.

Ndola Lime Company Limited (NLC) reported total revenues for the financial year ended 31st March 2018 of K60.1 million (2017: K89.6 million) and a loss after tax of K190 million (2017: K1.1 billion loss). There were no dividends distributed by NLC during 2017.⁴⁵ We understand that NLC has no interest in extractive company

3.8.2 Quasi-fiscal expenditures

ZCCM-IH and IDC have confirmed that there were no quasi-fiscal expenditures during the year 2017.

3.8.3 Barter arrangements

After reviewing the previous EITI reports and legislations in force, we understand that there are no infrastructure provisions and barter arrangements in extractive sector.

It should be noted that no payment flows related to barter arrangements involving infrastructure works have been identified nor confirmed by MoF.

3.9 Collection and Distribution of the Extractive Revenues

3.9.1 Budget process

The Zambian budget process has four main stages involving drafting, legislating, execution, auditing and publishing.

Stages	Description
(i) Drafting	This is the first phase in the budget process. In the Medium-Term Expenditure Framework (MTEF) arrangement, the government is required to engage in consultations with various stakeholders.
(ii) Legislative	Budgets are allocated taking into account the relevant provisions in the constitution. Budgetary allocations are enshrined in Section 117 (1) of the Constitution of Zambia. At this stage, the final result still lies heavily with legislature.

⁴⁴ Source : IDC website (<https://www.idc.co.zm/industry-sectors/mining-2/>)

⁴⁵ Source : ZCCM-IH 2018 Annual Report

Stages	Description
(iii) Execution	<p>At the implementation stage, Parliament questions the effectiveness and efficiency with which funds are utilised. Members of Parliament look out for issues of service delivery, overspending, misuse and misapplication - to areas other than those authorised or planned for.</p> <p>At the implementation stage, Parliament questions the effectiveness and efficiency with which funds are utilised. Members of Parliament look out for issues of service delivery, overspending, misuse and misapplication - to areas other than those authorised or planned for.</p>
(iv) Auditing	<p>The budgeting system in Zambia is audited by the office of the Auditor General which verifies whether funds have been spent on the authorised items. It also checks for any under or overspending, misappropriation, theft and whether resources have been utilised efficiently or not. The Report of the Auditor General on the accounts are available on the OAG website⁴⁶. The Auditor General follows the standards issued by the International Organization of Supreme Audit Institutions (INTOSAI).</p> <p>Post-budget period audits are the responsibility of the Public Accounts Committee (PAC). PAC examines historical records for disbursements and budget performance. A substantial part of the supplementary expenditure is often incurred on items and areas other than those which were originally envisaged. PAC has a specific mandate under the standing orders of Parliament and as such cannot initiate an investigation into any matter of public interest. PAC only makes recommendations to the Executive which is expected to enforce them.</p>
(v) Publishing	<p>Part X of Section 118 of the Republican Constitution requires that the National Treasury prepares and tables the State's consolidated Annual Financial Report, which includes information on revenues and other funds received and spent by the Government during the financial year. Besides being mandated by legislation, the Annual Financial Report is meant to provide a summary on National Government financial resources and their application for the benefit of the people of Zambia and other interest groups. The 2016 Annual Financial Report is available on the MoF website.⁴⁷</p>

3.9.2 Revenues Collection

Once minerals are monetised, the revenues due to the State have to be collected through the revenue collection framework. Under the current regime, all the payments are made in cash.

Payments are made by the companies to various Government Agencies. ZRA receives most of its funds from mining companies. ZRA has two operating divisions which are Customs Services Division and Domestic Taxes Division; with both collecting over 94% of all Zambia's taxes from the mining sector.

The other payments from the mining sector are made to local councils, where mining companies are based, to MoL and to the Ministry of Mines and Mineral Development.

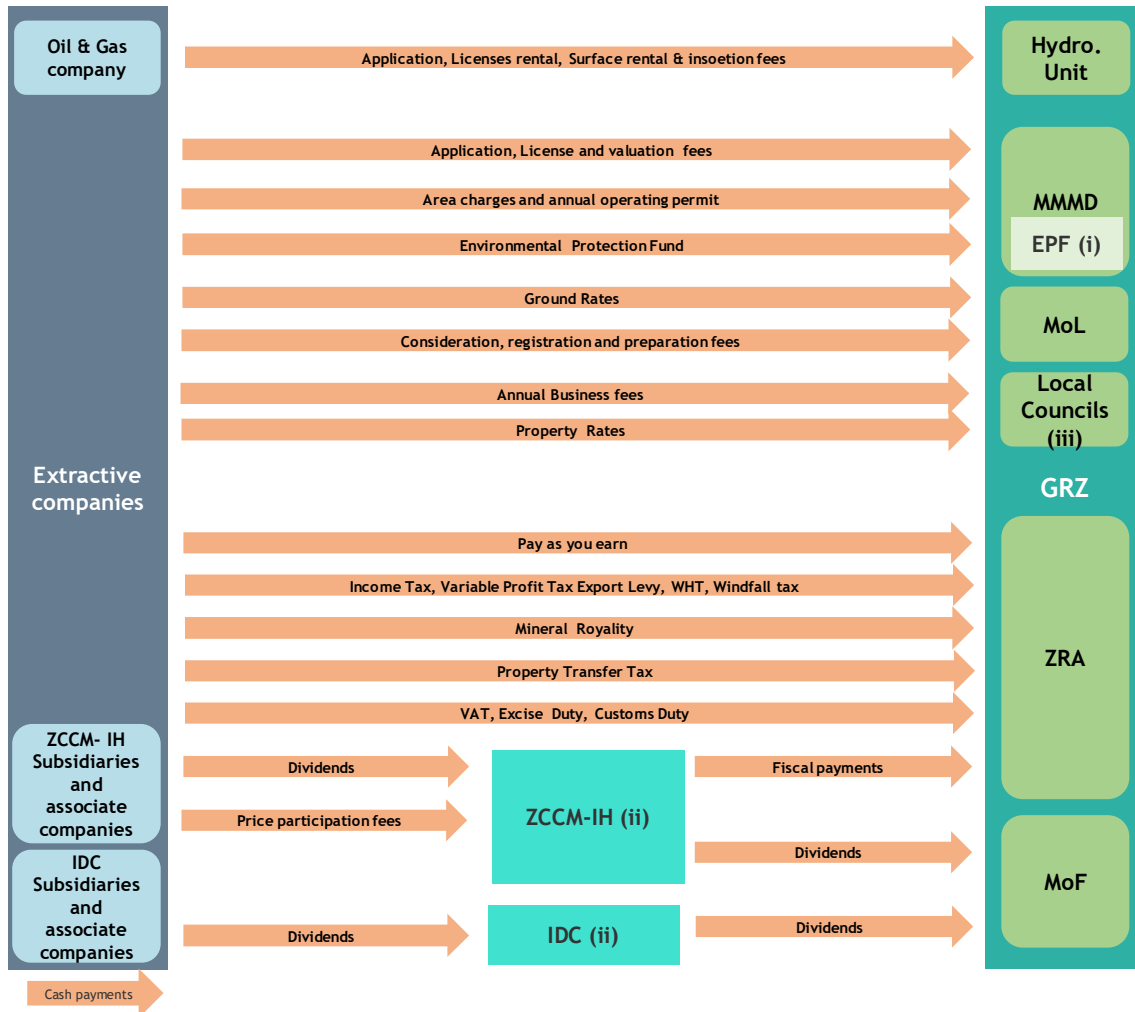

The Ministry of Finance is also part of the revenues collection framework through investments held in some Zambian mining companies (see Section 4.1.5 of this Report).

The extractive revenue collections framework can be represented diagrammatically as follows:

⁴⁶ <http://www.ago.gov.zm>

⁴⁷ <http://www.mof.gov.zm/>

Figure 2: Flow chart of extractive revenue collection

(i) Environmental Protection Fund

Payments to the Environmental Protection Fund (EPF) amounted to USD 238,763 in 2017

The payment obligations to the fund has two components. The first component consists of the following categories: five percent (5%), ten percent (10%), or twenty percent (20%), which depend on the classification of each mine and represents the component of the liability that needs to be paid as cash directly into the fund. The second component consists of the balance which is allocated as 95%, 90% or 80% of the environmental liability which needs to be secured in form of a bank guarantee.

EPF is supervised by MMMD through Statutory Instruments, (SIs) in particular SI No. 102 of 1998. EPF operates under the following fundamental guidelines:

- cash payment into EPF to be in hard currency;
- the developer's contributions to EPF shall be made in hard currencies (Cap. 213, S.76 (2) (b) and S.I 102 of 1998 (Regulation 8 (2));
- the balance on deposits lodged under S.1. 29 of 1997, Regulation 66 (1), (2) and (3) shall be secured with the Fund by the developer by way of lodgement of a Bond or Bank Guarantee to be determined by the Minister (Cap. 213, S. 76 (1) (b));
- funds to be Index-Linked, no interest earned;
- the developer's contribution shall retain its time-value with respect to inflation as calculated relative to hard currency (S.I. 102 of 1998 Regulation (8) (3)). At the expiry of a licence or permit, the developer shall be refunded the amount deposited to the extent that such amounts were not appropriated by government for payment of any progressive rehabilitation costs (Cap. 213, S. 82 (3) (a) and (b)). The refund shall not accumulate interest; and
- only the Fund Committee can approve withdrawals from EPF.

In the event that a developer is directed by the Director of MSD to take specific remedial action, and fails to do so, the Director shall execute the remedial action using the developer's contributions to the Fund which becomes recoverable (Cap 213, S/78 (1)). The developer's fund so used shall not exceed the amount of cash deposit lodged by him to the Fund (Cap 213, S. 82 (3) (b)). This therefore means that each developer can use only his contribution and will only get his contribution back.

Administrative expenses of operating the fund shall not exceed 1% of the total income of the Fund except during the commissioning of the office of the EPF Manager (S.I. 29, 1997 Regulation (5)).

Payments are made to the Fund in US Dollars and are retained in a USD bank account outside the state budget. As at 30 September 2018, a total of USD 27.5 million was held in the fund.⁴⁸ The cumulative balance in EPF as at October 29, 2019 is USD 30.1million.

(ii) ZCCM-IH/IDC

ZCCM-IH and IDC are part of the revenues collection framework through investments held by both SOEs in mining companies (detailed in Section 4.6.1 of this report).

Both ZCCM-IH and IDC pay taxes to several Government Agencies in accordance with prevalent laws and pays dividends to the government (as shareholder). In addition, both companies are entitled to dividends from the mining companies in which it holds shares. Under arrangements dating back to the privatisation of the industry ZCCM-IH is also collecting price participation fees.

(iii) Subnational payments to local councils

These payments include fees paid by extractive companies to the Ministry of Local Government and Housing (MoLGH), and specifically the Local Council. These payments consist mainly of property rates and annual business fees. These payments reconciled in Section 5 of this report.

3.9.3 Subnational transfers

The government's 2002 National Decentralisation Policy (officially launched in 2004) sets out greater responsibilities for local government in the delivery of public goods and services. However, in practice, the delivery of public goods and services in Zambia remains highly centralised. The budget does not show expenditure by urban or rural areas, but rather by line ministry, which means it is difficult to track where money is actually spent.

During 2010, the Zambian Government introduced a formula-based grant system, with the dual aim of making local government funding more predictable and transparent, and allowing government to better track the use of grants by councils. Data was not available to assess whether this reform initiative has operated as intended.

In accordance with Section 136 of the MMDA 2008, the Minister of Finance shall, in consultation with the Minister responsible for Mines, establish a mineral royalty sharing mechanism for distributing royalty revenues. This provision was repealed after the promulgation of the new MMDA 2015. The new code does not provide provision for the sharing of royalties. Therefore, subnational transfers are not applicable in Zambia.

3.9.4 Mining Revenues Management

The Effective PFM and expenditure management are critical to transforming revenue from natural resources into broad-based sustainable economic and social development. The areas of spending that have broader external benefits for the economy as a whole include, infrastructure and education.

However, as stated under Part III (13) of the Public Finance Act of 2004 of the Republic of Zambia, "There shall be established a Consolidated Fund into which all general revenues and other public funds accruing to the Treasury shall be credited. The amounts payable to the Consolidated Fund under sub-section (1) shall be deposited into the Treasury Account which shall be maintained at the Bank of Zambia."

The contributions by mining companies therefore lose their identities once they are deposited into the consolidated fund. Their use cannot therefore be tracked to public investment/expenditure or to expenditure unit/cost centers or project.

⁴⁸ ZEITI newsletter on 22 October 2018

3.10 Audit and Assurance Practices and Controls in Zambia

3.10.1 Extractive Companies

Private and listed companies

The Companies Act of 2017 prescribes the financial reporting requirements for private and public limited companies. All companies are required to prepare annual financial statements in compliance with the standards prescribed by ZICA. Zambia uses a three-tier Financial Reporting Framework. Entities are required to use one of the three frameworks depending on the type the entity. Under the three-tier financial reporting framework, Entities are categorized as follows⁴⁹:

No	Type of Entity	Financial Reporting Framework
1	Listed Companies, Public Interest Entities and Government Owned Enterprises	Full IFRS
2	Economically Significant Companies - companies that are not public companies or quoted on the stock exchange with turnover of K20 million and above	IFRS for SMEs or Full IFRS if the Company opts to use it
3	Micro and Small Entities - entities with Turnover of less than K20 million.	Zambian Financial Reporting Standard for Micro and Small Entities

Companies Act Section 252 states that The statement of financial position of a company's annual financial statements, to be laid before the company in a general meeting or delivered to the Registrar, shall be signed on behalf of the company by not less than two directors or, where the company has only one director, by that director.

Similarly, the Companies Act requires all companies except small private companies to appoint an auditor of the company. An auditing firm may be appointed to be the auditor of the company if:

- (a) at least one partner of the firm is ordinarily resident in Zambia;
- (b) all or some of the partners, including the partner who is ordinarily resident in Zambia, are qualified for appointment as auditors;
- (c) the firm is not indebted to the company; or
- (d) a partner of the firm is not a member, director or employee of the company or a related company.

Companies Act Section 256 states that a person shall not be appointed as auditor of a company unless that person is qualified and is registered to practice as an auditor by a body regulating the audit practice in Zambia.

The Annual financial statements of extractive companies are not systematically available to the public except for listed companies.

The Zambia Institute of Chartered Accountants (ZICA) is legally mandated to set auditing standards for application in Zambia. Zambia adopted the use of International Standards on Auditing as the standards to be used by all auditors in the Country. The Standards are to be applied in the audit of historical financial information.

State owned enterprises (SOEs)

SOEs in mining sector are established under the Companies Act and are therefore required to comply with the financial reporting requirements applicable to public limited companies. Specifically, they are required to prepare annual financial statements in terms of IFRS, subject them to an audit, and file an annual return with the registrar of companies.

Furthermore, the Public Finance Act 2004 mandates the AG to undertake the audit of SOEs in line with the International Standards of Supreme Audit Institutions (ISSAIs). The AG can secure services of private auditors to carry out such audits on his/her behalf.

⁴⁹ Source: <https://www.zica.co.zm/financial-reporting/>

3.10.2 Government Agencies

The annual Financial Statements of Government are prepared by the respective Ministries, Provinces and Spending Agencies (MPSAs). Within three months after the end of each financial year, the Ministry of Finance should consolidate the Financial Statements and prepare the annual Financial Report of the Republic. The information that should be included in the Financial Report are as follows:

- Revenue received by the Republic during that financial year;
- The expenditure of the Republic during that financial year;
- Gifts, donations and aid-in-kind received on behalf of the Republic in that financial year, their value and how they were disposed of;
- Debt repayments;
- Payments made in that financial year for purposes other than expenditure;
- The financial position of the Republic at the end of that financial year; and
- Other information as prescribed.

The financial statements are prepared according to the International Public Sector Accounting Standards (IPSAS) cash standard. The Government of the Republic of Zambia is in process of migrating move from the cash based accounting to accrual based International Public Sector Accounting Standards (IPSAS) by the year 2020. This effectively entails that all Government Ministries, Provinces and Spending Agencies will be required to prepare financial statements under accruals IPSAS framework⁵⁰.

The Auditor-General of Zambia has a constitutional mandate to audit all public resources in the republic. The Office of the Auditor General (OAG) is the only Supreme Audit institution in Zambia mandated to audit all Government institutions, parastatal organizations, statutory boards, donor funded agencies and any other organisation in which public resources have been invested.

The OAG produce an annual audit report called the “Report of the auditor general on the audit of the accounts of the republic” not later than nine months after the end of the next financial year. The annually reports produced since 2003 are publicly available through are available on the OAG website.⁵¹

The OAG conducts audits using International Standards of Supreme Audit Institutions (ISSAIs) and collaborates with other professions to conduct performance audits, for example, engineers.

The audit cover revenue and expenditure on the accounts for the Financial Year well as physical inspections of projects. The Report contains:

- Audit scope;
- Limitation of Scope;
- Audit Methodology;
- Audit Opinion;
- Key Audit Matters; and
- findings and recommendations identified during the audit process.

3.11 Beneficial ownership

The new Companies Act 2017 passed in November 2017 includes, amongst other things, beneficial ownership disclosure. The New Act provides for the disclosure of beneficial owners and the creation of a register of beneficial owners that will be kept at the Patents and Companies Registration Agency (PACRA)⁵².

“Ownership” is defined in section 3 of Companies Act 2017 and means a natural person who: (a) directly or indirectly, through any contract, arrangement, understanding, relationship or any other means ultimately owns, controls, exercises substantial interest in, or receives substantial economic benefit from a corporate; or (b) exercises ultimate and effective control over a legal person or legal arrangement; and the terms “beneficially own” and “beneficial ownership” shall be construed accordingly.

On the other hand, and under the same section, “Control” means the control of a company by a person who: (a) beneficially owns more than twenty-five percent of the issued share capital of the company; (b) is entitled to vote a majority of the votes that may be cast at a general meeting of the company, or has the ability to control the voting of a majority of those votes, either directly or through a controlled entity of that person; (c) is able to appoint or to veto the appointment of a majority of the directors of the company; (d) is a holding company and the company is a subsidiary of that company as provided for in this Act; (e) in the case of a company that is a trust, has the ability to control the majority of the votes of the trustees, to appoint the majority of the trustees

⁵⁰ Source : <https://www.zica.co.zm/public-sector/>

⁵¹ <http://www.ago.gov.zm/report.html>

⁵² <https://www.pacra.org.zm/#/>

or to appoint or change the majority of the beneficiaries of the trust; or (f) has the ability to materially influence the management policy or affairs of the company in a manner comparable to a person who, in ordinary commercial practice, can exercise an element of control referred to in paragraphs (a) to (e); In view of the above, the ZEC agreed to adopt the following definition:

“The beneficial owner in respect of a company means the natural person(s) who directly or indirectly ultimately owns or controls more than twenty-five percent of the issued share capital of the company.

The “ultimate beneficial ownership” shall mean a natural person, and not another company or a trust. For companies with complicated ownership structures, involving many different corporate vehicles or private agreements over ownership and/or control, the ultimate beneficial owners are the natural persons who are right at the very top of the chain.

Publicly listed companies, including wholly owned subsidiaries, are not required to disclose information on their beneficial owner(s). They have to provide only guidance on how to access this information.

In the case of joint ventures, each entity within the venture should disclose its beneficial owner(s), unless it is publicly listed or is a wholly owned subsidiary as per above. Each entity is responsible for the accuracy of the information provided.”

The new Companies Act, the declaration of beneficial ownership shall state, in respect of each beneficial owner:

- (i) the full names;
- (ii) the date of birth;
- (iii) the nationality or nationalities;
- (iv) the country of residence;
- (v) the residential address; and
- (vi) any other particulars as maybe prescribed.

With the enactment of the Companies Act No. 10 of 2017 and the passing of Companies (General) Regulations, Statutory Instrument No.14 of 2019, the Agency undertook some activities with respect to BO provisions. Some of the activities undertaken are as follows:

- the Agency conducted in-house training for members of staff with emphasis on BO owing to the fact that BO provisions have been incorporated in the Companies Act for the first time;
- the e-PACRA System has been developed in such a way that the BO data are captured in a separate electronic registry in the e-PACRA system. The hard copies are also retained;
- other than a register of shareholders, an electronic register of BO has been established, which could be accessed by members of the public if need be;
- for companies incorporated under the repealed Law, BOs are being captured using other post incorporation lodgements such as annual returns, allotment of shares and transfer of shares;
- The Agency sensitized and created awareness on BO to some members of the community in over 30 rural districts. This was done through corroboration with RUFEP;
- The Agency also sensitized and created awareness on BO to extractive industry. This was done with corroboration ZEITI in October 2019. The workshop was held at Sarova Hotel in Lusaka;
- The Agency will soon be corroborating with Zambia Mining Cadastre in so far as mining company information is concerned. This will also include BO information. The corroboration will be to ensure that data is shared so as to keep accurate records by both PACRA and the Mining Cadastre.

We understand that the register of beneficial owners is not yet set up and the only data available on the PACRA website (<https://www.pacra.org.zm/#/>) are the registration number, the date of registration and the annual return status.

The companies selected the scope were asked to report BO data according to the definition provided in the Companies Act 2017 and described above. The data collected is detailed in Annex 4 to this report.

4 DETERMINATION OF THE RECONCILIATION SCOPE

4. DETERMINATION OF THE RECONCILIATION SCOPE

The EITI Standard defines materiality as follows: “Payments and revenues are considered material if their omission or misstatement could significantly affect the comprehensiveness of the EITI Report.”

Different ways could be used to define materiality for the 2016 EITI Report. The most common way consists of defining materiality in terms of a minimum value of payment to government; the other could be based on the size of the company (for example, a minimum annual size) or the type of permit held (large scale, production).

The financial flows to be included in the reconciliation, the Government Agencies and companies which were required to report were determined by the ZEC based on the 2016 ZEITI Report.

4.1 Revenue Streams

The financial flows to be included in the reconciliation were determined by the ZEC based on the 2016 ZEITI Report. We have also considered the relevant legislations in force and previous EITI Reports.

4.1.1 Ministry of Mines and Minerals Development

After reviewing the previous EITI reports and legislations in force, particularly the 2015 MMDA, we have identified 12 categories of fees and charges payable by mining companies to MMMD. These fees and charges are set out in the table below:

No.	Payment flow
1	Application Fees
2	Licence Fees
3	Area Charges
4	Alteration - Application Fee
5	Transfer Application Fee
6	Transfer Licence Fees
7	Search and Other Fees
8	Environmental Protection Fund

According to the table above we can regroup the fees and charges payable to MMMD in six (6) categories:

No.	Payment flow
1	Application Fees
2	Licence Fees
3	Area Charges
4	Valuation Fees
5	Environmental Protection Fund

These fees and charges payable by mining companies to MMMD were included in the scope of reconciliation for the exercise 2017.

4.1.2 Zambia Revenue Authority

The MSG agreed:

- i. to maintain the list of payment flows selected for the 2016 reconciliation;
- ii. deferral VAT refunded to mining companies by ZRA should be included in order to reflect a better net contribution of mining companies to the budget during the period covered by the EITI Report;
- iii. wind fall and variable profit taxes should be excluded as they have now been repealed; and
- iv. Motor Vehicle Fees, Motor Vehicle Surtax, Carbon Emission Surtax, Turnover Tax and Fuel Levy do not present material flows of the total payments to ZRA, and as such should be excluded from the scope.

4.1.3 Ministry of Local Government and Housing (Sub National Payments)

The contribution to the Ministry of Local Government and Housing (MoLGH), and specifically the Local Councils, will be restricted to two fees as per the last 4 Reconciliation exercises:

- Property rates; and
- Annual Business Fees.

These payments were included because they are important to the areas served by local councils and based on information set out in the previous reconciliation reports.

4.1.4 Ministry of Lands

Five types of fees are payable to the Ministry of Lands by mining companies:

No.	Payment flow
1	Ground Rent
2	Consideration Fees
3	Registration Fees
4	Preparation fees
5	Others-Invitation to Treat / Title Deeds

It was agreed that all the above 5 types of fees will be included in order to ensure completeness of income.

4.1.5 Ministry of Finance

The dividends received from State Owned Enterprises in the 2017 reconciliation exercise as well as the revenues received from the sale of GRZ shareholding in these companies, were included in the scope of the reconciliation.

4.1.6 ZCCM-IH

As per the previous reconciliation exercises, the 2017 reconciliation exercise included the following revenue streams:

No.	Payment flow
1	Dividends from ZCCM-IH Shares
2	Price participation fees
3	Revenues from ZCCM-IH shareholding sale
4	Revenues from ZCCM-IH mining rights transfer

4.1.7 Industrial Development Corporation

IDC is a state-owned asset management company and does not fall under the scope of Requirement 4.5. However, the 2017 reconciliation exercise should include dividends and other significant payments through unilateral disclosure of mining companies.

4.1.8 Social Payments

These consist of all contributions made by extractive companies to promote local development and to finance social projects in line with EITI Requirement 6.1. This Standard encourages MSG to apply a high standard of transparency to social payments and transfers, the parties involved in the transactions and the materiality of these payments and transfers to other benefit streams, including the recognition that these payments may be reported even though it is not possible to reconcile them.

These contributions can be made in cash or in kind. This category includes, inter alia: health infrastructure, school infrastructure, road infrastructure, market gardening infrastructure, projects related to the promotion of the agriculture and the grants provided to the population.

We understand that there are no legal or contractual provisions for mandatory social payments in Zambia. However, the voluntary social payments were included in the 2017 EITI scope through unilateral disclosure of mining companies. These payments can be summarised as follows:

No.	Payment flow
1	Corporate Social Responsibility In kind payments
2	Corporate Social Responsibility cash payments

4.1.9 Sub National Transfer

In accordance with Section 136 of the Mines and Minerals Development Act 2008, the Minister of Finance shall, in consultation with the Minister responsible for Mines, set up a mineral royalty sharing mechanism for distributing royalty revenues.

However, after the promulgation of the new MMDA 2015, the provisions of former Section 136 were repealed. The new code does not provide provision for royalty sharing.

4.1.10 State's share of production and other in-kind revenues

a) Oil and Gas

All Oil and Gas companies are in the exploration phase. Therefore, there are no in-kind revenues in the oil and gas sector. Furthermore, the current Petroleum regulations does not provide provisions for production sharing. In the event of a discovery and commencement of oil production, the company would be subject to pay royalties at a rate of 12.5% of the wellhead value for the crude oil and 5% of the wellhead value for the natural gas⁵³.

b) Mining

After reviewing the previous EITI reports and legislation in force we understand that there are no in-kind revenues in the mining sector.

4.1.11 Infrastructure provisions and barter arrangements

a) Oil and Gas

All Oil and Gas companies are in the exploration phase. We understand that there are no infrastructure provisions and barter arrangements in mining sector.

b) Mining

After reviewing the previous EITI reports and legislations in force, we understand that there are no infrastructure provisions and barter arrangements in mining sector.

4.1.12 Other Significant Payments

The reporting template included an additional heading in order to report any other significant payments made/collected during 2017 and not included in the previous revenue streams like Litigations and others.

4.2 Extractive Companies

4.2.1 Oil and Gas

According to the information made available by MMMD, there were no activities carried out by extractive companies during 2017 in the Oil and Gas sector.

The Geological Survey Department (GSD) of MMMD has confirmed that ten (10) petroleum exploration licenses were active during 2017. GSD has also confirmed that there were no contracts signed between the Government and oil and gas companies

The fees and surface rentals related to Exploration licences are due in USD or Kwacha equivalent and are as follows:

FEES AND SURFACE RENTALS (Regulations 40 and 41)	Fee Units	Kwacha (K0.3/unit)
1 Fees for inspection of the Register		
<i>For general search and examination of the Register</i>	3,000	900
<i>For the supply of a copy of, and entry on, the Register</i>	5,278	1,583
2 Application fee for petroleum exploration licence and its renewal	26,389	7,917
3 Application fee for a development and production licence	52,778	15,833
4 Annual licence fee (exploration)	300,000	90,000
5 Annual licence fee (production)	1,019,444	305,833
6 Surface rentals		
<i>Initial exploration period per square kilometre or kwacha equivalent</i>	53	16
<i>first renewal period per square kilometre or kwacha equivalent</i>	106	32
<i>second renewal period per square kilometre or kwacha equivalent</i>	158	47
<i>annual surface rentals for a licence area during the production period (per square kilometre or part thereof)</i>	26,389	7,917

⁵³ First Schedule, Part 2 of the Petroleum Exploration and Production General Regulations 2010.

As a result, it was agreed to include the Oil and Gas companies in the 2017 EITI report through a unilateral disclosure by the government agencies of the combined benefit stream from Oil and Gas operator listed in Annex 1 to this Report

4.2.2 Mining

The MSG agreed to select the same in scope companies as in ZEITI Report 2016. Accordingly, the reconciliation scope allows a coverage of more than 79% of the total revenues collected by ZRA from mining companies.

4.3 Reconciliation Scope

According to the above, the agreed perimeter includes 36 revenue streams, 9 extractive companies and 24 Government Agencies.

These revenue streams are listed in the table below:

N°	Description of payment	
MMMD		
1	Application Fees	Fees paid when applying for a prospecting license or mining license.
2	Area Charges	Annual rental for mining and non-mining rights.
3	Valuation Fees	Fees paid for laboratory analysis of mineralogical samples.
4	Annual Operating Permit	Annual fee payable by all Extractive Companies to MMMD in order to obtain the appropriate permits from the Director of Mines Safety to undertake mining operations.
5	Environmental Protection Fund	Fee charged to Extractive Companies for environmental rehabilitation purposes.
6	Other fees & charges	To be used by Government Agencies and mining companies in case there were any material receipts or payments not listed elsewhere on the ZEITI template (> ZMW 20 million).
ZRA		
7	Pay- As-You-Earn	Tax paid by employees on all their emoluments. The employer acts as an agent for the Government and deducts the tax from the employee emoluments which it remits to ZRA.
8	Import VAT	Value Added Tax paid by Extractive Companies on the import of goods into Zambia including imports of minerals and concentrate from other jurisdictions.
9	Mineral Royalty	Royalty payable is calculated at 3% of the market value of minerals FOB less the cost of smelting, refining and insurance, handling and transport from the mining area to the point of export or delivery within Zambia. Royalty payments may be deferred if the cash operating margin of a holder of a Large-Scale Mining falls below zero.
10	Company Income Tax (including Provisional Tax)	All Extractive Companies are taxed on their taxable income which is determined in line with the Zambian Income Tax Act. Income in this case relates to revenue less all tax allowable expenditure. The company tax rates are 30% for mining incomes and 35% for hedging incomes. This also includes the compulsory instalments paid during the year as a provisional tax.
11	VAT	This payment type refers to the net Output VAT payable by the Extractive Companies, after taking into account Input VAT incurred on business purchases and/or business expenditure.
12	Import/Customs Duty	Customs/Import duty is a tax levied on ZRA specified goods imported into Zambia.
13	Withholding Taxes	This is a tax where any person or company making certain payments is required to deduct from such payments and remit to ZRA. The payments that attract WHT include management and consultant fees, commissions, rent dividends and payments to non-resident contractors. The WHT rate is 15%.
14	Excise Duty - Electrical Energy	Excise duty is a tax levied on ZRA specified goods imported into Zambia.
15	Property Transfer Tax	This is a tax paid upon the sale or transfer of property by the person selling or transferring the property based on the value of the property. Property in our case refers to land, buildings, shares and mining rights (effective 1 January 2013).
16	Advance Income Tax	A 6% advance income tax is levied on commercial imports, subject ministerial remission. Where paid, this tax may be deducted from the taxpayer's final income tax for the fiscal year.
17	Export Levy	This tax is levied at 10% on concentrate minerals.
18	Other taxes (ZRA)	To be used by Government Agencies and mining companies in case there are any material receipts or payments not listed elsewhere on the ZEITI template (> ZMW 20 million).

N°	Description of payment	
19	VAT claimed	Amount of VAT paid by mining companies on purchases of goods and services, excluding import VAT and VAT collected and paid directly to ZRA, and which is not yet refunded to the company. This line should be filled by mining companies only.
Local Councils		
20	Annual Business Fees	Operating fees paid to the local councils in which the Extractive Companies operate.
21	Property Rates	Property taxes payable to the local authority by all Extractive Companies who own properties.
MoL		
22	Ground Rent	Annual lease payments made to the Ministry of Lands in respect of leasehold properties owned by the Extractive Companies.
23	Consideration Fees	These are fees paid to show that the offered to land has accepted the offer. They are only paid once at the beginning when the land has been offered. In short, payment of these fees symbolises acceptance of offer to buy land.
24	Registration Fees	These are service charges that go towards the process of registration and formulation of the certificate of title at the Lands Deeds Department.
25	Preparation fees	These are service charges towards the preparation of the lease document by the office of the Commissioner of Lands before it goes to the Lands and Deeds Department for final registration and formulation.
26	Others-Invitation to Treat / Title Deeds	
MoF		
27	Dividends from Government Shares	This is the distribution of profits in proportion to the shares held directly in the Extractive Company and ZCCM-IH by GRZ.
28	Revenues from GRZ shareholding sale	This relates to revenues received by GRZ from the transfer of the shares held in State owned companies operating in the mining sector.
ZCCM-IH		
29	Dividends from ZCCM-IH Shares	This is the distribution of profits in proportion to the shares directly held in the Extractive Company by ZCCM-IH.
30	Price participation fees	Price participation fees received from the companies in which it has shareholding.
31	Revenues from ZCCM-IH shareholding sale	This relates to revenues received by ZCCM-IH from the transfer of the shares held in Extractive Companies operating in Zambia including in their parent companies.
Social Payments		
32	Corporate Social Responsibility In kind payments	These flows affect all contributions made by extractive companies in the local development area including expenditure incurred by extractive companies to finance infrastructure projects, health, education, roads, and market gardening for individuals.
33	Corporate Social Responsibility cash payments	These flows relate to contributions made by extractive companies in the local development. Flows covered in this section include cash payments made by extractive companies to support actions of local communities including compensation others that those granted directly for the individuals.
Other Significant Payments		
34	Other Significant Payments	To be used by Government Agencies and mining companies in case there were any material receipts or payments not listed elsewhere on the ZEITI template (> ZMW 20 million).

These companies are listed in the table below:

No.	Company
1	KANSANSHI MINING PLC
2	KONKOLA COPPER MINES PLC
3	LUMWANA MINING COMPANY LIMITED
4	KALUMBILA MINERALS LIMITED
5	FIRST QUANTUM MINING AND OPERATIONS LTD
6	MOPANI COPPER MINES PLC
7	CHAMBISHI COPPER SMELTER LIMITED
8	MAAMBA COLLIERIES LIMITED
9	ZCCM INVESTMENTS HOLDINGS PLC

These Government Agencies are listed in the table below:

Ministries			
1	Zambian Revenue Authority (ZRA)	3	Ministry of Lands
2	Ministry of Mines and Minerals Development	4	Ministry of Finance
Stated Owned Enterprises			
5	ZCCM-IH	6	Industrial Development Corporation (IDC)
District Councils			
7	Mufulira Municipal Council	16	Ndola City Council
8	Kalulushi Municipal Council	17	Lufwanyama District Council
9	Zimba District Council	18	Lusaka City Council
10	Kitwe City Council	19	Mumbwa District Council
11	Chililabombwe District Council	20	Sinazongwe District Council
12	Luanshya District Council	21	Solwezi Municipal Council
13	Chingola Municipal Council	22	Kafue District Council
14	Kabwe District Council	23	Choma Municipal Council
15	Mazabuka District Council	24	Chilanga District Council
25	Kalumbila municipal council		

Additionally, the State-Owned Enterprise ZCCM-IH, will also report on payments made to other Government Agencies.

4.4 Reporting by Project Level

The EITI Board decision of 8 March 2017, reaffirmed that project level reporting is required. The national multi-stakeholder group should devise and apply a definition of the term project that is consistent with relevant national laws and systems as well as international.

According to Guidance Note 29 on project level reporting, the global practice in defining project shows that one of the key take-aways is that what constitutes a project is linked to the forms of legal agreement(s) governing extractive activities between the government and companies. In other words, in a production-sharing regime, a project is typically the contract that gives rise to payment liabilities. In a tax/royalty regime, a project is typically the license that gives rise to payments.

Therefore, the following definition for projects was adopted:

“In Zambia, a project is defined as the operational activities that are governed by a single licence and forms the basis for payment liabilities with a government”.

The table below summarizes which payment flows are levied at project level and therefore can be disclosed at this level:

N°	Description of payment	Disclosed by company	Disclosed by project
MMM

38	Other Significant Payments	√	

Where payments are attributed to a specific project, then the total amounts per type of payments shall be disaggregated by project. Where payments are levied at an entity level rather than at a project level, the payments will be disclosed at an entity level rather than at a project level.

Furthermore, the SoEs should disclose their payments to other government agencies by project where applicable

4.5 Level of Disaggregation

The Reporting Templates and the data are submitted:

- by extractive company;
- by Government Agency; or SoE for each company/taxpayer selected in the reconciliation scope;
- by tax and by type of payment flow as detailed in the Reporting Template; and
- by project for each payment flow where applicable.

For each payment flow reported, companies/taxpayers and Government Agencies must produce details by receipt / payment, by date and by beneficiary.

The companies will also be requested to provide:

- information on their beneficial ownership; and
- the audited financial statements for 2017.

4.6 Materiality Deviation and acceptable reconciliation difference

The materiality deviation is the threshold of immaterial differences per revenue stream for which the IA will not carry out investigation. The materiality deviation is set at ZMW 10,000

It was agreed to set the final reconciliation difference at 1% as a maximum which is fairly acceptable.

5 RECONCILIATION RESULTS

5. RECONCILIATION RESULTS

5.1 Payment Reconciliation between Extractive Companies and Government Agencies

We received reporting from 8 companies and 4 government agencies, 12 local councils and the State Company ZCCM-IH. The table below presents aggregated cash flows as reported:

- The companies initially reported payments of ZMW 9,820,523,780 to the Government. The payments reported by the companies were ZMW 192,325,689 higher than the payments reported by the Government.
- Out of these discrepancies, ZMW 1,051,748,264 is explained discrepancies from companies, while ZMW 764,503,643 is explained discrepancies from the Government.

The remaining unsolved discrepancies amounting ZMW 479,570,309 represents 4.61% of the revenues reported by the Government. This is above the acceptable final reconciliation difference set by the MSG at 1%.

Aggregated payments	Initial reporting (ZMW)	Resolved discrepancies (ZMW)		Adjusted reporting (ZMW)
		Companies	Government	
Companies	9,820,523,780	1,051,748,264		10,872,272,044
Government	9,628,198,091		764,503,643	10,392,701,735
Discrepancy	192,325,689	1,051,748,264	764,503,643	479,570,309
%	2.00%			4.61%

All resolved discrepancies have been discussed and approved by the concerned reporting entities.

5.1.1 Cash flows per company

The detailed results of the reconciliation exercise per company are presented in the following table with post-reconciliation differences noted between amounts reported as paid by in-scope extractive companies and amounts reported as received by government agencies:

N	Company	Templates originally lodged			Adjustments			Final amounts		
		Company (a)	Govt (b)	Difference (a-b)	Company (d)	Govt (e)	Difference (d-e)	Company (f) (a+d)	Govt (g) (b+e)	Difference (f-g)
1	KANSANSHI MINING PLC	2,688,037,063	1,897,284,699	790,752,364	(13,467,343)	926,915,528	(940,382,870)	2,674,569,720	2,824,200,226	(149,630,506)

5.2 Adjustments

5.2.1 Extractive Companies Adjustments

The adjustments were carried out on the basis of confirmations from extractive companies and Government Agencies and were supported by adequate evidence wherever deemed appropriate. The adjustments made are detailed as follows:

Adjustments to extractive company payments	Total amount (ZMW)
Tax paid not reported (a)	1,211,622,626
Tax paid reported but outside the reconciliation scope (b)	(14,082,014)
Tax reported but not paid (c)	(22,667,448)
Tax incorrectly classified (d)	(26,379,591)
Tax paid reported but outside the period covered (e)	(96,745,309)
Total added/deducted to amounts originally reported	1,051,748,264

(a) Tax paid not reported

These are payments reported by Government Agencies but were not reported by extractive companies. We set out in the table below a summary of the adjustments made to company payments:

Company	Tax paid not reported (ZMW)
LUMWANA MINING COMPANY LIMITED	652,351,240
MOPANI COPPER MINES PLC	516,795,988
KONKOLA COPPER MINES PLC	37,912,144
FIRST QUANTUM MINING AND OPERATIONS LTD BM M S	3,919,134
KANSANSHI MINING PLC	644,120
Total adjustments	1,211,622,626

After receiving and examining details of payments sent by extractive companies, we noted that the amounts originally recorded in the reporting templates were incorrect. Several taxes were underreported including VAT, Income Tax, Pay- As-You-Earn, Withholding Taxes and others. We therefore adjusted reported payments based on confirmations from the companies and/or a review of the supporting documents. For instance, LUMWANA MINING COMPANY LIMITED underreported VAT for an amount of ZMW 649,882,083. Moreover, MCM did not report the Income Tax, Import VAT and VAT paid in 2017 and amounting ZMW 250,000,000, ZMW 167,526,495 and ZMW 99,269,493 respectively.

(b) Tax paid but outside the reconciliation scope

These are adjustments made to amounts reported but not foreseen in the reporting templates:

Company	Tax paid reported but outside the reconciliation scope (ZMW)
KANSANSHI MINING PLC	(13,974,774)
MAAMBA COLLIERIES LIMITED	(107,240)
Total adjustments	(14,082,014)

(c) Tax reported but not paid

These are amounts declared by the following companies but were not actually paid in 2017. ZRA made offsets for these payments with other refunds due to these companies:

Company	Tax reported but not paid (ZMW)
FIRST QUANTUM MINING AND OPERATIONS LTD	(22,530,759)
KANSANSHI MINING PLC	(136,689)
Total adjustments	(22,667,448)

(d) Tax incorrectly classified

These are adjustments made to report but incorrectly classified:

Company	Tax incorrectly classified (ZMW)
KONKOLA COPPER MINES PLC	(26,379,591)
Total adjustments	(26,379,591)

(e) Tax paid reported but outside the period covered

These are payments reported, but which fall outside the reconciliation period, i.e. before 1 January 2017 or after 31 December 2017. We set out in the table below a summary of the adjustments made to company payments:

Company	Tax paid reported but outside the period covered (ZMW)
KONKOLA COPPER MINES PLC	(96,745,309)
Total adjustments	(96,745,309)

5.2.2 Adjustments to Government Agencies templates

The adjustments were carried out on the basis of confirmations received from extractive companies or from Government Entities and supported by payment receipts wherever deemed appropriate. These adjustments are detailed as follows:

Adjustments to Government payments	Total amount (ZMW)
Tax received not reported (a)	984,675,046
Tax amount incorrectly reported	1,072,732
Tax received on other identification number (b)	(120,305,237)
Tax reported but not received (c)	(77,758,268)
Tax received reported but outside the period covered (d)	(23,180,630)
Total added/deducted to amounts originally reported	764,503,643

(a) Tax received not reported

These are payments not reported by Government Agencies although they were received from extractive companies in 2017. We set out in the table below a summary of the adjustments made to Government agencies payments:

Company	Tax received not reported (ZMW)
KANSANSHI MINING PLC	929,689,205
KONKOLA COPPER MINES PLC	52,272,420
LUMWANA MINING COMPANY LIMITED	2,057,445
ZCCM INVESTMENTS HOLDINGS PLC	372,179
FIRST QUANTUM MINING AND OPERATIONS LTD BM M S	226,198
MAAMBA COLLIERIES LIMITED	57,599
Total adjustments	984,675,046

After receiving and examining details of payments sent by ZRA, we noted that the amounts originally recorded in the reporting templates were incorrect. Several taxes were underreported including VAT, Pay- As-You-Earn, Withholding Taxes and others. We therefore adjusted reported payments based on confirmations from the companies and/or a review of the supporting documents. For instance, ZRA did not report the VAT received from Kansanshi Mining Plc (KMP) in 2017 and amounting ZMW 929,689,205.

(b) Tax received on other identification number

These are taxes reported by ZRA but received from out of scope companies. These adjustments are detailed as follows:

Company	Tax received on other identification number (ZMW)
KALUMBILA MINERALS LIMITED	(120,305,237)
Total adjustments	(120,305,237)

(c) Tax reported but not received

These are amounts declared for the following companies but were not actually received in 2017. ZRA made offsets for these payments with other refunds due to these companies:

Company	Tax reported but not received (ZMW)
KONKOLA COPPER MINES PLC	(73,780,559)
KANSANSHI MINING PLC	(3,977,708)
Total adjustments	(77,758,268)

(d) Tax received reported but outside the period covered

These are payments reported, but which fall outside the reconciliation period, i.e. before 1 January 2017 or after 31 December 2017. We set out in the table below a summary of the adjustments made to company payments:

Company	Tax received reported but outside the period covered (ZMW)
ZCCM INVESTMENTS HOLDINGS PLC	(23,178,862)
KONKOLA COPPER MINES PLC	(1,768)
Total adjustments	(23,180,630)

5.3 Unreconciled Differences

Following the reconciliation adjustments made, the unresolved differences amount to (ZMW 437,107,762) and are broken down by extractive company in the table below:

No.	Company	Unreconciled difference	Reasons for differences			
			Missing extractive company detail by payment	Tax not reported by the extractive company	Tax not reported by the Govt Body	Not material difference < ZMW 10,000
1	KANSANSHI MINING PLC	(149,630,506)	-	(30,393)	(149,604,278)	4,165
2	KONKOLA COPPER MINES PLC	795,155,107	8,099,213	(4,573,467)	791,629,361	(1)
3	LUMWANA MINING COMPANY LIMITED	2,251,822	389,206	(13,443,287)	15,305,904	(0)
4	MOPANI COPPER MINES PLC	14,053,671	6,711,572	116,579	7,225,520	0

5.4 Unilateral Disclosure of Revenues by Government Agencies

Government Agencies were requested to disclose unilaterally revenue streams collected from companies but not included within the reconciliation scope in accordance with EITI Requirement 4.1.d. Details of revenues by Payment Flow are set out in the table below:

N°	Description of payment	Revenues in ZMW
ZRA		2,661,700,373
1	Value Added Tax	1,091,232,062
2	Employment Tax (Pay as You Earn)	538,133,421
3	Income Tax	387,288,148
4	Mineral Royalty Tax	375,899,165
5	Withholding Tax	169,041,296
6	Property Transfer Tax	99,783,481
7	Turnover Tax	321,884
8	Presumptive Tax	917
Local Councils		46,573,713
9	Property Rates	46,374,727
10	Annual Business Fees	140,437
11	Manganese Levy	58,550
ZCCM-IH		33,978,808
12	Dividends from ZCCM-IH Shares (*)	33,978,808
Environmental Protection Fund		2,276,581
Geological Survey Department (Petroleum Unit)		1,348,800
13	Area Charges	1,168,800
14	Annual Licence Fees	180,000
Total payments		2,745,878,275

(*) Dividend received from CEC amounting USD 3,563,625.

6 ANALYSIS OF REPORTED DATA

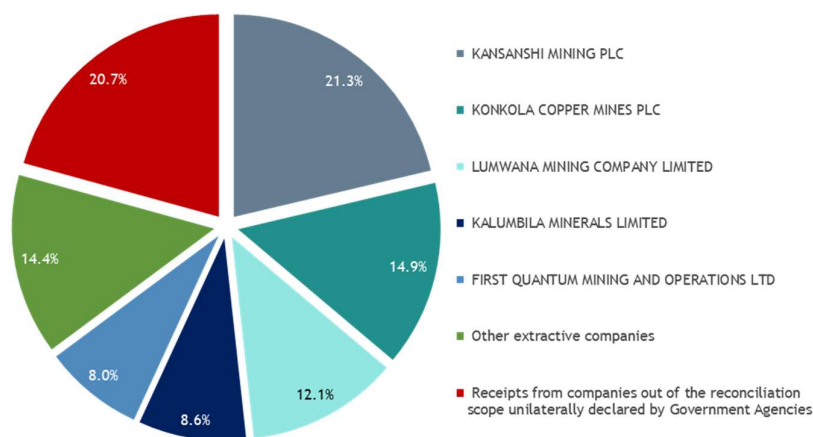

6. ANALYSIS OF REPORTED DATA

6.1 Analysis of Government Revenues

6.1.1 Analysis of payments by companies' contribution

The analysis of Government revenues by companies' contribution indicates that 5 companies contributed approximately 65% to the total Government revenues in 2017 and that Kansanshi Mining Plc accounts for almost 21.3% of the country's extractive revenues for that period.

Figure3: Analysis of payments by companies' contribution

The list of payments by contribution flows is shown in the table below:

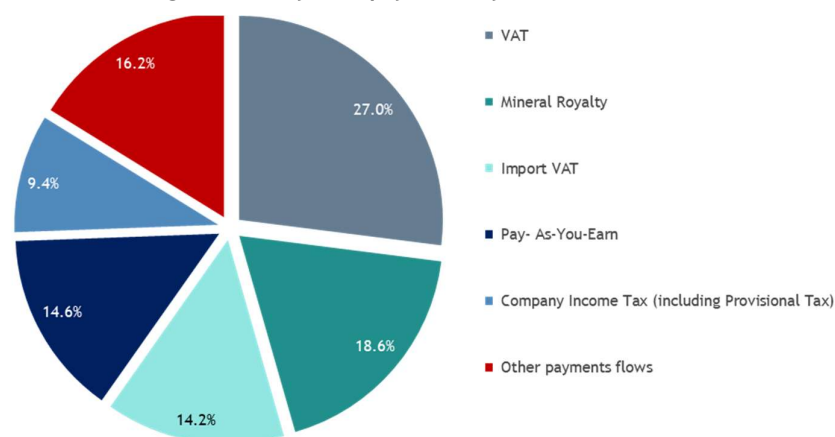

No.	Company	Total payments to Government (ZMW)	% of total Government revenues
1	KANSANSHI MINING PLC	2,824,200,226	21.3%
2	KONKOLA COPPER MINES PLC	1,968,022,480	14.9%
3	LUMWANA MINING COMPANY LIMITED	1,603,723,763	12.1%
4	KALUMBILA MINERALS LIMITED	1,139,906,174	8.6%
5	FIRST QUANTUM MINING AND OPERATIONS LTD	1,054,883,624	8.0%
6	MOPANI COPPER MINES PLC	978,170,233	7.4%
7	CHAMBISHI COPPER SMELTER LIMITED	545,580,195	4.1%
8	MAAMBA COLLIERIES LIMITED	260,868,469	2.0%
9	ZCCM INVESTMENTS HOLDINGS PLC	17,346,569	0.1%
	Social payments unilaterally declared by extractive companies	112,719,024	0.9%
	Receipts from companies out of the reconciliation scope unilaterally declared by Government Agencies	2,745,878,275	20.7%
	Total	13,251,299,034	100.0%

The breakdown of unilateral disclosure by company is set out in the Annex 10.

6.1.2 Analysis of payments by contribution flows

The analysis of the payments by flow shows that the top 5 taxes contributed 83.8% of the total Government extractive revenues collected by ZRA. We also note that VAT accounts for the highest proportion of total government revenue (27%).

Figure 4: Analysis of payments by contribution flows

The list of payments by contribution flows is shown in the table below:

No.	Company	Total payments to Government (ZMW)	% of total Government revenues
1	VAT	3,577,727,839	27.0%
2	Mineral Royalty	2,459,526,548	18.6%
3	Import VAT	1,884,894,275	14.2%
4	Pay- As-You-Earn	1,939,037,415	14.6%
5	Company Income Tax (including Provisional Tax)	1,243,332,903	9.4%
6	Price participation fees	662,195,642	5.0%
7	Import/Customs Duty	518,187,658	3.9%
8	Withholding Taxes	560,715,018	4.2%
9	Property Transfer Tax	99,955,298	0.8%
10	Property Rates	100,034,638	0.8%
11	Excise Duty - Electrical Energy	49,047,247	0.4%
12	Dividends from ZCCM-IH Shares	33,978,808	0.3%
13	Area Charges	6,185,731	0.05%
14	Environmental Protection Fund	2,276,581	0.02%
15	Ground Rent	497,381	0.004%
16	Annual Business Fees	418,177	0.003%
17	Turnover Tax	321,884	0.002%
18	Annual Licence Fees	180,000	0.001%
19	Manganese Levy	58,550	0.0004%
20	Presumptive Tax	8,417	0.0001%
	Social payments unilaterally declared by extractive companies	112,719,024	0.9%
	Total	13,251,299,034	100%

6.1.3 Analysis of payments by Government Agencies

During 2017, ZRA collected the largest value of taxes included in the reconciliation followed by ZCCM-IH as shown in the table below:

No.	Company	Total payments to Government (ZMW)	% of total Government revenues
1	Zambian Revenue Authority (ZRA)	12,332,747,002	93.9%
2	ZCCM- IH	696,174,450	5.3%
3	Local Councils	100,511,365	0.8%
4	Ministry of Mines and Minerals Development	6,373,231	0.05%
6	Environmental Protection Fund	2,276,581	0.02%
5	Ministry of Lands	497,381	0.004%
	Total extractive sector (*)	13,138,580,010	100%

(*) This total does not include the social payments

6.1.4 Analyses of revenues declared by Local Councils

According to the above table, the contribution of the Local Councils through the Property Rates and Annual Business Fees collected from the extractive companies to the total extractive revenue is immaterial. However, these payments were included in the reconciliation scope because they are important to the areas served by Local Council.

We present in the table below details of these receipts by Local Councils:

Company	Property rates (ZMW)	Annual Business Fees (ZMW)	Manganese Levy (ZMW)	Total
CHILANGA	1,566	151,157		152,724
CHILILABOMBWE	49,503	11,240,000		11,289,503
CHINGOLA		10,900,000		10,900,000
KABWE		57,613		57,613
KAFUE	84,975	122,334		207,309
KALULUSHI		9,116,698		9,116,698
KITWE		4,845,911		4,845,911
LUANSHYA		6,426,643		6,426,643
LUFWANYAMA	9,000	2,095,192		2,104,192
LUSAKA	13,332	-		13,332
MAZABUKA	5,563	147,132		152,695
MUFULIRA	25,487	11,134,338		11,159,825
MUMBWA		600,000		600,000
NDOLA		6,854,805		6,854,805
SIAVONGA	5,000	-		5,000
SINAZONGWE	218,750	1,257,798		1,476,548
SOLWEZI		17,918,835		17,918,835
ZIMBA	5,000	-		5,000
MANSA			58,550	58,550
Kalumbila	17,166,182	-		17,166,182
Total	17,584,358	82,868,456	58,550	100,511,365

6.2 Analysis of Social Payments

Companies were requested to report social payments and transfers made during 2016 unilaterally. We set out in the tables below the amounts reported by extractive companies:

No.	Company	In Cash	In Kind	Total
1	KANSANSHI MINING PLC		44,063,594	44,063,594
2	KONKOLA COPPER MINES PLC		7,732,804	7,732,804
3	LUMWANA MINING COMPANY LIMITED	6,084,720		6,084,720
4	MOPANI COPPER MINES PLC	18,013,390		18,013,390
5	KALUMBILA MINERALS LIMITED	1,264,753	29,140,002	30,404,755
6	FIRST QUANTUM MINING AND OPERATIONS LTD BM M S			-
7	CHAMBISHI COPPER SMELTER LIMITED			-
8	ZCCM INVESTMENTS HOLDINGS PLC		137,091	137,091
9	MAAMBA COLLIERIES LIMITED	6,282,670		6,282,670
	Total	31,645,533	81,073,491	112,719,024

The breakdown by beneficiary is set out in the Annexe 9.

6.3 Analysis of Payments by Project

Companies were requested to report, where possible, some payment flows made during 2017 by project. The following definition for projects was adopted:

“In Zambia, a project is defined as the operational activities that are governed by a single licence and forms the basis for payment liabilities with a government”.

Tables below set out the amounts reported by extractive companies by project and payment flows:

No.	Company	License n°	MMMD					ZRA		Local councils		Total
			Application Fees	Licence Fees	Area Charges	Valuation Fees	Annual Operating Permit	Environmental Protection Fund	Mineral Royalties	Property Transfer Tax	Annual Business fees	
1	KANSANSHI MINING PLC	7057 HQ LML			417,726			773,150	862,399,726		8,959,418	872,550,020
		17019-HQ-LEL		22,462								22,462
2	KONKOLA COPPER MINES PLC	7074 - HQ - LML			16,170							16,170
		7075 - HQ - LML			192,715							192,715

NC: Not Communicated

6.4 Analysis of Employment Data

Companies were requested their foreign and domestic employees' number during 2017. We set out in the tables below the number of direct employees reported by extractive company:

No.	Company	Direct domestic employees	Direct foreign employees	Total
1	KANSANSHI MINING PLC	2,779	174	2,953
2	KONKOLA COPPER MINES PLC	NC	NC	-
3	LUMWANA MINING COMPANY LIMITED	1,646	58	1,704
4	MOPANI COPPER MINES PLC	5,535	99	5,634
5	KALUMBILA MINERALS LIMITED	NC	NC	-
6	FIRST QUANTUM MINING AND OPERATIONS LTD	NC	NC	-
7	CHAMBISHI COPPER SMELTER LIMITED	NC	NC	-
8	ZCCM INVESTMENTS HOLDINGS PLC	NC	NC	-
9	MAAMBA COLLIERIES LIMITED	225	20	245
	Total	10,185	351	10,536

NC: Not communicated

6.5 Analysis of Production Data

On the basis of data reported by MMMD, we present below the production quantities and values by mining company and by mineral type:

Copper

Company	Total extracted (in Metric Tonnes)	Production Value (in US \$ million) ⁵⁴	%
KANSANSHI MINING PLC	250,860	1,547.48	31.5%
KONKOLA COPPER MINES PLC	86,585	534.11	10.9%
LUMWANA MINING COMPANY LIMITED	116,171	716.62	14.6%
MOPANI COPPER MINES PLC	44,144	272.31	5.5%
KALUMBILA MINERALS LIMITED	190,913	1,177.68	23.9%
CHIBULUMA MINES PLC.	11,300	69.71	1.4%
Luanshya Copper Mine	43,693	269.53	5.5%
Lubambe Copper Mine	18,037	111.26	2.3%
NFCA - Chambishi Mine	27,706	170.91	3.5%
Sino Metals	7,858	48.47	1.0%
Total	797,266	4,918.08	100%

Other minerals

Company	Mineral	Total extracted (in Metric Tonnes)	Unit	Value (in US \$ million)
Kansanshi Mining	Gold	4,565	Kg	183.31
MAAMBA COLLIERIES LIMITED	Coal	77,500	Tonnes	n/a
Kagem Mining Limited	Emerald and Beryl	4,374	Kg	n/a
Grizzly Mining	Emerald and Beryl	55,689	Kg	n/a
Ndola Lime	Limestone	23,965	Thousand metric tons	n/a
Ndola Lime	Quicklime	29,153	Thousand metric tons	n/a
Ndola Lime	Hydrated Lime	13,650	Thousand metric tons	n/a

⁵⁴ Value of production estimated on basis of annual prices provided by the World Bank Commodity Price Data (The Pink Sheet)

Company	Mineral	Total extracted (in Metric Tonnes)	Unit	Value (in US \$ million)
KAMPOKO RESOURCES LIMITED	Manganese Ore	92,675	Metric tonne (MT)	n/a
Zambezi Portland Cement	Cement	478,096	Metric tonne (MT)	n/a
Lafarge Cement	Cement	811,716	Metric tonne (MT)	n/a
Dangote Quarries Zambia Limited	Cement	807,712	Metric tonne (MT)	n/a

6.6 Analysis of the VAT Credit

Extractive companies have been requested to report VAT Credit's Data for the fiscal year 2017. VAT Credit is defined as the amount of VAT paid by mining companies on purchases of goods and services and which is not yet refunded to the companies.

It is worth noting that VAT Credit has been declared only by the in-scope companies and has not been reconciled or confirmed by ZRA.

Furthermore, VAT Credit as detailed below relates only to the VAT Credit declared by the in-scope companies in their VAT returns 2017. Hence, it does not represent a cumulative amount up to December 2017 neither considers the refunds and/or offsets that would have been done by ZRA.

The VAT Credit reported by the in-scope companies in 2017 is as follows:

Company	Amount (ZMW)
KANSANSHI MINING PLC	-
Konkola Copper Mines PLC	1,616,511,196
LUMWANA MINING COMPANY LIMITED	-
MOPANI COPPER MINES PLC	614,835,482
KALUMBILA MINERALS LIMITED	190,817,785
FIRST QUANTUM MINING AND OPERATIONS LTD BM M S	212,674,961
CHAMBISHI COPPER SMELTER LIMITED	1,796,526,664
ZCCM INVESTMENTS HOLDINGS PLC	-
MAAMBA COLLIERIES LIMITED	-
Total	4,431,366,088

7 RECOMMENDATIONS

7. RECOMMENDATIONS

7.1 2017 IA Recommendations

7.1.1 Gender parity in the ZEC members

Requirement 1.4 a) ii of the EITI Standard (2019) stipulates that the multi-stakeholder group and each constituency should consider gender balance in their representation to progress towards gender parity. Furthermore, the EITI Standard stipulates that MSG should consider access challenges and information needs of different genders and subgroups of citizens.

Currently, there are 36 members in the ZEC composed of 1 woman and 35 men. We also noted that the ZEITI workplan covering the period 2019-2020 does not describe the way gender challenges and need will be addressed.

We recommend that the ZEC should take measure and start discussion with each stakeholder representation to ensure gender balance in its composition and to update the work plan and to document how Gender issues will be taken into account.

7.1.2 Beneficial ownership data disclosure

According to Requirement 2.5 of the EITI Standard, EITI countries should maintain a publicly available register of the beneficial owners of the corporate entities that apply for or hold a participating interest in an exploration or production oil, gas or mining license or contract.

Zambia has made a meaningful progress by passing the new Companies Act 2017 which includes provisions for the disclosure of beneficial owners and the creation of a register of beneficial owners that will be kept at the Patents and Companies Registration Agency (PACRA)⁵⁵

We understand that the register of beneficial owners is not yet set up and the only data available on the PACRA website (<https://www.pacra.org.zm/#/>) are the registration number, the date of registration and the annual return status. Currently, beneficial ownership is disclosed in ZEITI Report only for companies involved in the reconciliation exercise.

We recommend that the PACRA should accelerate the implementation of the BO Register and take necessary steps towards making the register public.

7.1.3 Completeness of the data reported on license register

The Zambian Ministry of Mines and Mineral Development and Trimble Land Administration have developed an online Mining Cadastre Portal to improve transparency and promote investment in the Zambia mining sector. Basic information and data on mining activities and mineralisation are available at <http://portals.flexicadastre.com/zambia/>. This interface provides information such as details of mining licences that are active in Zambia. It allows to see the licensed areas, all assigned mining titles, beneficiaries and the type of product, the date of the license application, the date of attribution and the validity of the license.

However, the online portal does not include information on the tax identification number and the BO of the licence holders. This situation does not enable the resulting data to be interoperable and more easily reused.

We recommend that MMMD includes systematically these information in the online Mining Cadastre Portal.

7.1.4 Management of the Environmental Protection Fund

The Environmental Protection Fund (EPF) has been established in 2008 with the aim to provide assurance that the mines developers execute environmental and social impact statements in accordance with the Mines and Minerals (Environmental) Regulations 1997 and undertake the rehabilitation of mining areas.

We understand that the current amount under the EPF is USD 30.1 million as at October 2019. However, we note that:

- the mining companies were not complying with the EPF's regulations in that the majority were not paying the stipulated contributions;
- there is no investment policy for the fund;
- there is no hedging strategy to ensure value of time; and
- There is no fund manager.

We recommend improving the implementation of the Environmental Protection Fund (EPF) by setting up a clear investment policy, appointing a fund manager and ensuring that all mining companies comply with the EPF requirements.

⁵⁵ <https://www.pacra.org.zm/#/>

7.1.5 Disclosure of the production values

According to Requirement 2.5 of the EITI Standard, implementing countries must disclose production data for the fiscal year covered by the EITI Report, including total production volumes and the values of production by commodity.

MMMD provided the IA with all the commodities volumes produced in Zambia in 2017. However, we note that MMMD does not collect or hold any information about the values of the minerals produced. Therefore, the IA has estimated the values of Copper and Gold on the basis of the World Bank Commodity Price Data. In the absence of such data for the other commodities, it has not been possible to estimate the total value of production of all the commodities in Zambia in 2017.

We recommend that MMMD collects and discloses accurate and comprehensive information about the values of the minerals produced in the future EITI reports. MMMD should clearly document the methods and assumptions used to determine that minerals values and ensure that these are consistent from one year to another.

7.1.6 Lack of an up to date follow-up of VAT credits

Extractive companies have been requested to report VAT Credit's Data for the fiscal year 2017. VAT Credit is defined as the amount of VAT paid by mining companies on purchases of goods and services and which is not yet refunded to the companies. VAT Credit has been declared only by the in-scope companies since ZRA is not able to conform the cumulative balance as at December 2017.

In fact, the up to date amount of VAT credit cannot be obtained instantaneously from ZRA's on-line system, but it should rather go through several databases in order to combine all previous VAT declarations and VAT refund histories in order to come up with the current status of a single taxpayer. We also noted that ZRA's system does not take into account refunds made through tax offsets.

We recommend that ZRA improves the follow-up of VAT refunds and credits by interfacing ZRA's system with other IT modules dedicated for transactions made with taxpayers as "Declaration module" and "payment module". This would also help determine VAT credit for any taxpayer in real time.

7.1.7 Assessment of deviations from the licensing procedure

According to Requirement 2.2 of the EITI Standard, implementing countries are required to disclose any non-trivial deviations from the applicable legal and regulatory framework governing license transfers and awards made during the accounting period covered by the EITI Report.

We understand that the Mining Cadastre Department has issued a letter to confirm that all awards and transfers of mining licences were done according to the provisions of the Ministry of Mines and Minerals Development Act (MMDA) 2015. The letter confirms also that there were no deviations from the applicable legal and regulatory framework governing licence transfers for the period covered by the EITI Report.

We also understand that the Office of the Auditor General (OAG) carried out a compliance audit on the awarding and monitoring of mining rights for 2017. However, the related report is not yet published.

ZEC might consider increasing the assurance level and aligning with best practises of other EITI implementing countries by considering in future reports a sample of license award and transfer to check whether there were any material deviations in practice.

We also recommend to make the OAG report on the awarding and monitoring of mining rights for 2017 available to the public.

7.2 Follow up of recommendations of previous EITI Processes

Recommendation	Implementation	Comments
Follow up of the latest validation results		
License allocations (2.2)	Yes	The report includes the process of licences transfer, licences transferred during 2017 and a reference to Sections 22 and 31 of the MMDA which set the criteria to be considered when assessing application. Please refer to Section 3.5. The Mining Cadastre Department issued a letter on 12 December 2019 to confirm that there were no deviations from the applicable legal and regulatory framework governing licence transfers and awards for the period concerned. The letter is presented in Annex 11.
Data reliability (4.9)	On going	The report includes the assurance procedures agreed by the MSG as well as the results and the assessment of the data reliability. Please refer to Section 2.4.
EITI Implementation (Last EITI Report)		
1 Lack of feedback on reconciliation queries	No	Some queries sent the reporting companies and Government agencies remained unanswered to the date of this report. As a result, we ended up with unreconciled differences between amounts reported by extractive companies and Government Agencies of ZMW 479,570,309, which represents 4.61% of total payments reported by Government Agencies.
2 Disclosure of the Beneficial Ownership data	On going	The implementation of the BO register has been started by PACRA. Please refer to Section 7.1.2. For the EITI data, we note that not all in scope companies complied with the disclosure of beneficial ownership. The companies disclosed only the direct shareholders and their capital structures.
3 Implementation of systematic online disclosure	On going	The systematic online disclosure has not been implemented for the EITI data 2017. However, we understand that a feasibility study for mainstreaming the EITI data is on-going.
4 Lack of database for contact details	Yes	A comprehensive list of contacts of all the reporting entities has been obtained from the ZEITI secretariat.
5 Reporting deadlines not met by Government Agencies and Extractive Companies	No	Many companies and Government entities submitted their data with delay.
6 Reporting templates not correctly prepared	On going	The Reporting Templates submitted by the companies are not comprehensive and some required information were missing (See Recommendation 7.1.3). Furthermore, we note that some specific templates i.e disclosure of BO and Barter Arrangements were not filled in by the reporting entities.
7 Implementation of MSG sub-groups	Yes	We note that the following MSG subgroups have been created: <ul style="list-style-type: none"> - Mainstreaming technical working group - Data quality assurance technical working group - Policy and data analysis working group
8 Implementation of a reporting system for Employment data	Yes	Employment data is collected by the Mine Safety Department.
9 Enactment of EITI reporting regulations	On going	We understand that a legal framework to strengthen transparency and accountability in Zambia's extractive sector is being drafted.
Governance of the Mining Sector (Last EITI Report)		
1 Lack of revenues sharing system	No	No revenues sharing system implemented to date.

Recommendation	Implementation	Comments	
Follow up of the latest validation results			
2	Strengthening and empowerment of the ASM sector	On going	Capacity building to the ministry staff has been implemented. However, there is still room for improvements with regards to the capacity of ASM workers.
3	Improvement of the environmental remediation	On going	The Government of Zambia has commenced implementing a project on mining and environmental remediation. Please see Section 3.4.
4	Review of the ZDA investment Act	No	The ZDA investment Act has not been reviewed.
5	Improvement of Tax assessment	No	ZRA did not consider setting up a thresholds system to require audited accounts from the taxpayers.
6	Completeness of the data reported on license register	No	The license register still does not include the Tax Identification Number.

Annex 7 - Evaluation Criteria for Bids for Petroleum Exploration Licence

	Evaluation Criteria	Maximum score (%)
1	Pre-Qualification Documentation Photocopy of registration card/certificate of incorporation/original power of attorney/original proof of data package purchase	-
2	a) Report on execution of past operation N.B. , 0 years - 0%, 1 to 5 years - 5%, 5 to 10 years - 7% and Above 10 years - 10%	10
3	b) Programme for employment and training of Zambians i) Employment: <ul style="list-style-type: none"> • Zambian in Senior Management • Graduate Zambian • More than five (05) Zambians ii) Training <ul style="list-style-type: none"> • Plan for professional training • Plan for skills training 	1 1 1 1 1
	c) Programme to support local business development (amount spent locally) N.B. , One point awarded for each US\$100,000 per annum up to a maximum of five points	5
4	Particulars of technical qualifications and industrial experience of applicant and key employees a) Company/applicant N.B. Petroleum exploration experience - 5%, General exploration experience - 3%, and No exploration experience - 0% b) Qualification and experience of key staff <ul style="list-style-type: none"> • Any Zambians listed as key staff • Highest relevant academic qualification (PhD degree - 5%, Master's degree - 4%, Bachelors' degree - 3%, Diploma - 2%, Certificate - 1%) • Relevant experience (10 years - 5%, 8 years - 4%, 6 years - 3%, 4 years - 2%, 2 years - 1%, 0 years - 0%) N.B. One point for every two years of experience.	5 5 5 5
5	a) Financial resources available (>US\$200m - 5%, US\$150m to US\$200m - 4%, US\$100m to US\$150m - 3%, US\$50m to US\$100m - 2%, US\$20m to US\$50m - 1%, <US\$20m - 0%) b) Financial guarantees c) Projected cash flow statement for four years d) Documentary support of resources to support cash flow statement e) Evidence of available capital f) Evidence of available credit facilities	5 1 1 1 1 1
6	Audited financial statements and annual report for the last three years N.B. , Three years - 5%, Two years - 3%, One year - 1%, and 0 year - 0%	5
7	Proposed programme of exploration operations and the estimated cost a) Exploration phases and activities <ul style="list-style-type: none"> • Desktop study • Aerial/ground survey • Exploratory drilling • Evaluation and appraisal • Feasibility study b) Exploration programme costs <ul style="list-style-type: none"> • Desktop study (<10% of total cost - 2%) • Aerial/ground survey (less than or equal to 30% % of total cost - 4%) • Exploratory drilling (less than or equal to 30% % of total cost - 3%) • Evaluation and appraisal (less than or equal to 30% % of total cost - 4%) • Feasibility study (> 10% of total cost - 2%) N.B. Desktop study - 2% if less than 10% of total exploration cost, Aerial and/or ground survey - 5% if 50% or more of total exploration cost,	3 5 5 5 2 2 4 3 4 2

	Evaluation Criteria	Maximum score (%)
	<i>Exploratory drilling - 5% if 40% or more of total exploration cost, and Feasibility study - 3% if equal to or greater than 10% or more of total exploration cost</i>	
8	Environmental Impact Assessment a) Identification of anticipated impacts b) Proposed mitigation measures c) Timeline for submission of the Strategic Environmental Assessment report to the Zambia Environmental Management Agency (ZEMA) - Within twelve months from date of grant of licence	3 3 4
	TOTAL	100%

Annex 8 - Evaluation Criteria for applications for Mining Licence

Application for exploration licence	
1	The applicant has the financial resources and technical ability to conduct the proposed exploration optimally in accordance with the exploration work programme
2	the estimated expenditure is compatible with the proposed exploration work programme, area size and duration of the exploration work programme
3	If the land is within a National Park, Community Partnership Park, Game Management Area, bird or wildlife sanctuary, National Forest, Local Forest, Botanical Reserve or private forest or is land to which subsection (1) of section fifty-two applies, the applicant has obtained the necessary written consent of the appropriate authority;
4	The proposed programme of exploration operations is adequate and makes proper provision for environmental protection
5	The proposed exploration area is not the same as, and does not overlap in any manner with, an existing mining right or mineral processing licence area
6	If the applicant is a holder, that the applicant has not contravened any condition of the licence or permit or any provision of the MMDA Act
Application for mining licence	
Common criteria	
1	Whether there are sufficient deposits or resources of minerals to justify their commercial exploitation
2	The area of land over which the licence is sought is not in excess of the area required to carry out the applicant's proposed programme for mining operations
3	The proposed programme of mining operations is adequate and compliant with the decision letter in respect of the environmental project brief or environmental impact assessment approved by the Zambia Environmental Management Agency
4	where consent is required for the area under any written law, that the applicant has submitted evidence of that consent
5	The standards of good mining practice and the applicant's proposed programme for development, construction and mining operations in order to ensure the efficient and beneficial use of the mineral resources for the area over which the licence is sought;
6	the applicant is not in breach of any condition of the exploration licence or any provision of MMDA Act
In respect of large scale	
7	whether the applicant has the financial resources and technical competence and the financing plan is compatible with the programme of mining operations
8	The applicant's undertaking for the employment and training of citizens and promotion of local business development;
9	whether the applicant's feasibility study report is bankable
10	The applicant's capital investment forecast

REPUBLIC OF ZAMBIA
MINING CADASTRE DEPARTMENT
P.O Box 31969
LUSAKA

12th December, 2019

The Acting Head
Zambia EITI

Dear Sir,

**RE: TECHNICAL AND FINANCIAL CRITERIA FOR AWARDING AND TRANSFERS
OF LICENCES AT THE MINING CADASTRE IN ZAMBIA**

The subject matter refers.

I refer to your letter dated 12 December 2019 in relation to the technical and financial criteria used to award mining rights at the mining cadastre.

I wish to state that in 2017 and 2018, the awarding of mining licences was done on a first-come, first-served basis. We also wish to state that in 2017 and 2018, the transfers of mining licences was done according to the provisions of section 66 of the Ministry of mines and minerals development Act (MMDA) 2016.

Both the decision to award the licences and also the transfer of licences were decided in accordance with the criteria set out in section 22 and 31 of the MMDA 2015.

We hereby confirm that there were no deviations from the applicable legal and regulatory framework governing licence transfers and awards for the period concerned.

Michael Chibonga
Director
MINING CADASTRE DEPARTMENT
