REPUBLIC OF ZAMBIA

MINISTRY OF MINES AND MINERALS DEVELOPMENT

What Mainstreaming in Zambia can look like.

Meeting for the Zambia EITI Council (ZEC)

Presented by Tabila Mazhamo-Mining Cadastre Dept.

20th November 2017

Mineral Resources Development Policy 2013

Mining Rights Administration

In order to ensure efficiency and transparency in the administration ,Government will maintain an efficient computerised mining cadastre system

REPUBLIC OF ZAMBIA

Guiding Principals in Minerals development Policy of 2013

The guiding principals in Mineral Resource Development Policy **are as follows;**

➢**Maintain efficiency, effectiveness, transparency and accountability in private and public financial management**

➢**The application of modern principals of transparency checks and balances ,and accountability in administration of mining laws and regulations.**

Mining Cadastre Department

4.   The Mining Cadastre Department

A Department in the Ministry of Mines and Minerals Development responsible for the administration of mining rights and mineral processing licence

REPUBLIC OF ZAMBIA

Milestones Achieved in Mainstreaming

As a ministry we have managed to mainstream some of our activities regarding public access to the current status of mining rights and applications. This data is available on our cadastre portal in real time

We are also in the process of including data on oil blocks on the cadastre portal

The Ministry has also a website which we have started populating with data on licensing.

eGovernment Portal - Components

Our Goals -E-governance and Transparency

- E-government solution
  - A modern system allowing citizens and licence holders to interact with government and obtain necessary data online
- Public access to information
  - Provides licence holders with live up-to-date access to their licence portfolio
  - Assists prospective applicants with the information they need to apply for new licences

Integration of the Flexicadastre System with the One Stop System (OSSIS) at PACRA

We are in the process of linking up with the Patents And Company Registration Agency to access and extract information from on beneficial ownership. This data will be displayed on our Mining Cadastre Portal in real time.

Integration of Flexicadastre System with the Mineral Value Chain Monitoring System

We are in the process of linking up the flexicadastre system with the Mineral Value Monitoring System in order to capture data on Mineral Production. This will be useful in tracking and enhancing revenue collection in the extractive sector

Integration with the One Stop Shop System(OSSIS) at PACRA

We are in the process of linking up with the Patents And Company Registration Agency (PACRA)to access and extract information on beneficial ownership.

The extraction into our system will occur at time of application. This data will be linked to our online Mining Cadastre Portal in real time.

REPUBLIC OF ZAMBIA

Higher Level Strategy of the Government regarding Improved Transparency and Accountability ?7NDP

- **11.4.1 Strategy 1: Strengthen transparency and accountability mechanisms**

- The Government will strengthen structures such as Ward Development Committees, DDCCs, PDCCs and NDCC, to increase avenues for engagement on development issues.

- The Government will also reform Sector Advisory Groups and other advisory institutions to conform them to the integrated development approach of the Plan.

- In addition, the Government will operationalize the provisions of the law which provide for creation of WDCs. The Government will also review the National Anti-Corruption Policy and Act to enhance protection of whistle blowers.

- **THANK YOU**
